**Compromising Yellowstone** Michael J. Yochim,2004 Four case studies all drawn from Yellowstone National Park s  
recent history examine the relationship between interest groups and the National Park Service NPS in park policy making  
The NPS initiates and controls most policy making efforts with political influence common Major interest groups include  
environmentalists recreation advocates business groups and scientists Differing motivations and perspectives on park  
purpose create controversies that usually result in compromises Case studies begin with first an NPS effort about 1960 to  
zone portions of Yellowstone Lake as non motorized conservationists and the NPS contested boating groups and some  
powerful politicians The second study details efforts to close the Fishing Bridge village amid concerns that grizzly bears were  
dying in unacceptable numbers in that area Business and recreatioinal interests contested the NPS who received little  
support from environmental groups The third study details the fire policy review that took place after the historic 1988  
wildfires Widespread scientist support for allowing wildfires to burn natually overcame economic and political opposition The  
final study examines the ongoing snowmobile controversy finding that all four primary interest groups are involved strongly  
engaging the debate through litigation and political maneuvering Throughout conservationists believe parks to be sacred  
nature preserves and have the most supportive relationship with the NPS Recreational groups cherish individual freedoms  
and strive to retain park access they often contest NPS intentions Business groups envision parks as exonomic generators  
with a primary purpose being the promotion of local and regional economies they are effective at compelling the NPS to  
compromise Scientists lead in promoting science based park management but sometimes fail to provide consistent or timely  
direction All interest groups assume that park resource exploitation is inappropriate and find the NPS relatively open to their  
input POlitical influence is pervasive and in Yellowstone s case generally favorable to economic enhancement and public  
access The compromise settlements may weaken overall park protections but preserve Yellowstone as one of America s  
wildest places Such controversies are the medium through which Americans contest core values that reflect conflicting  
relationships between people and nature and by which Yellowstone is defined as a wild place      Bulletin of the Atomic
