Poles Apart English Edition:

Bakhtin and Translation Studies Dr. Amith Kumar P.V., 2016-01-14 This book investigates the process of translation in light of the dialogical principles proposed by the Russian literary theorist and philosopher Mikhail Bakhtin. It problematizes interlingual translations by questioning the two extreme tendencies in translation: namely, complete target-orientedness on the one hand and close imitation of the source text on the other. In the field of cultural encounters, it envisages a Bakhtinian model which is proposed as an alternative to the existing interpretations that discuss the cultural subtleties when two different cultures encounter each other. The overall framework of the book is Bakhtinian; that is, it adopts a dialogic approach and its main focus is the examination of a Western theoretical formulation through examples from Indian literatures and cultural situations. Such an extension of Bakhtin's ideas, especially to explore examples from Indian literary, cultural, and translational fields, has not yet received sufficient attention. The study is not only a unique endeavour in filling up the lacunae but also draws Bakhtin closer to the Indian literary condition.

Kripke John P. Burgess, 2013-04-03 Saul Kripke has been a major influence on analytic philosophy and allied fields for a half century and more. His early masterpiece *Naming and Necessity* reversed the pattern of two centuries of philosophizing about the necessary and the contingent. Although much of his work remains unpublished, several major essays have now appeared in print, most recently in his long-awaited collection *Philosophical Troubles*. In this book, Kripke's long-time colleague, the logician and philosopher John P. Burgess, offers a thorough and self-contained guide to all of Kripke's published books and his most important philosophical papers, old and new. It also provides an authoritative but non-technical account of Kripke's influential contributions to the study of modal logic and logical paradoxes. Although Kripke has been anything but a system-builder, Burgess expertly uncovers the connections between different parts of his oeuvre. Kripke is shown grappling often in opposition to existing traditions with mysteries surrounding the nature of necessity, rule-following, and the conscious mind, as well as with intricate and intriguing puzzles about identity, belief, and self-reference. Clearly contextualizing the full range of Kripke's work, Burgess outlines, summarizes, and surveys the issues raised by each of the philosopher's major publications. Kripke will be essential reading for anyone interested in the work of one of analytic philosophy's greatest living thinkers.

[The Oxford Guide to Literature in English Translation](#) Peter France, 2000 Translation has been a crucial process in world culture over the past two millennia and more. In the English-speaking cultures, many of the most important texts are translations from Homer to Beckett, the Bible to Freud. Although recent years have seen a boom in translation studies, there has been no comprehensive yet convenient guide to this essential element of literature in English. Written by eminent scholars from many countries, *The Oxford Guide to Literature in English Translation* meets this need and will be essential reading for all students of English and comparative literature. It highlights the place of translation in our culture, encouraging awareness of the issues raised, making the translator more visible. Concentrating on major writers and works, it covers translations out of many languages from Greek to Korean, from

Swahili to Russian For some works e g Virgil s Aeneid which have been much translated the discussion is historical and critical showing how translation has evolved over the centuries and bringing out the differences between versions Elsewhere with less familiar literatures the Guide examines the extent to which translation has done justice to the range of work available The Guide is divided into two parts Part I contains substantial essays on theoretical questions a pioneering outline of the history of translation into English and discussions of the problems raised by specific types of text e g poetry oral literature The second much longer part consists of entries grouped by language of origin some are devoted to individual texts e g the Thousand and One Nights or writers e g Ibsen Proust but the majority offer a critical overview of a genre e g Chinese poetry Spanish Golden Age drama or of a national literature e g Hungarian Scottish Gaelic There is a selective bibliography for each entry and an index of authors and translators

Rationalising the Bible — Volume 1 Ivy Bedworth,2016-02-28

Rationalising the Bible is a collection of volumes that cover the books of the Old and New Testaments of the Holy Bible Written by mostly unidentified authors the Bible is generally attributed with being the moral compass of the world of Judeo Christian religious adherents In fact the Bible is mostly mythological history inaccurate science exaggerated reports of violence and discrimination against the people who settled the Fertile Crescent and a set of laws plagiarised from those already in existence in the area Even the writing of it claimed to be that of the patriarchs can clearly be identified in the reading of it as belonging rather to a period when all people in the civilised world were writing their stories It was not written as atheists often charge by illiterate nomadic tribespeople in pre history Instead it was written by politicians and priests at a time when the western civilisations were making their mark on the world s politics

Pole's Apart Michelle McMeekin, 2011-06-01 Description Poles Apart tells the story of how suffering from severe mental health problems since the age of 17 nearly destroyed Michelle But now strangely when she looks back at her life she feels it has made her stronger It took ten years before she was diagnosed with Bi polar disorder Her low episodes were caused by very excessive stress in the workplace as a personal assistant in local government and she had three breakdowns at the ages of 17 22 and 27 During this last one she threw herself under a train and miraculously survived with no injuries She was sectioned into a Victorian style mental hospital This she says was sheer hell on earth I decided to write my autobiography because I am convinced that there will be a lot of people out there in this stressful age who have suffered like me If one person picks up my book and I give them hope by everything that has happened to me and how my life is now happy and fulfilled then I will have a great sense of personal achievement I would like fellow sufferers who are currently still very ill to see that even though life seems so bleak at times things can turn round and you can get better About the Author Although married for 4 years Michelle was surprised to find herself pregnant Throughout the whole of the pregnancy she was still very depressed and convinced she was dying and that her body was tricking her into thinking she was pregnant Nobody knew Eventually she gave birth to Kirsty who she calls my darling daughter now aged 8 This turned her life around for the better Something registered in my sub conscious when I had Kirsty and I stopped thinking I was dying how could a dying body give birth to a healthy child Michelle loved being a mother and says she went a bit high afterwards but leveled off Sixteen months later she had a second daughter my lovely Lauren now aged 6 I love motherhood and I believe it has been my saviour

Finding Europe Anthony Molho, Diogo Ramada Curto, Niki Koniordos, 2007 In the last decade or so many books have been devoted to the history of Europe Two conceptual axes predominate in a large number of these accounts a discourse focusing on Europe's values and another discourse fashioned largely in opposition to the first which emphasizes the process of European construction The first conceives of Europe's past teleologically as a process by which certain values Christian ethics individualism capitalism tolerance republicanism due process etc were affirmed and came to define European culture The second approach rejects the discourse on values emphasizes the post Enlightenment emergence of the concept of Europe and the political and ideological implications in its continuous redefinitions and re-elaborations during the past two or more centuries This volume offers new approaches that integrate the long temporal dimension of the values based approach albeit devoid of its teleological element with the constructivist interpretation
