Handbook of Test Security

James A. Wollack, John J. Fremer, 2013-09-02 High stakes tests are the gatekeepers to many educational and professional goals As such the incentive to cheat is high This Handbook is the first to offer insights from experts within the testing community psychometricians and policymakers to identify and develop best practice guidelines for the design of test security systems for a variety of testing genres Until now this information was scattered and often resided inside testing companies As a result rather than being able to learn from each other s experiences each testing entity was left to re create their own test security wheel As a whole the book provides invaluable insight into the prevalence of cheating and best practices for designing security plans training personnel and detecting and investigating misconduct to help develop more secure testing systems and reduce the likelihood of future security breaches Actual case studies from a variety of settings bring to life how security systems really work Examples from both domestic and international programs are provided Highlights of coverage include Best practices for designing secure tests Analysis of security vulnerabilities for all genres of testing Practical cheating prevention and detection strategies Lessons learned in actual security violations in high profile testing programs Part I focuses on how tests are delivered for paper and pencil technology based and classroom testing and writing assessment Each chapter addresses the prevalence of the problem and threats to security prevention and detection Part II addresses issues essential to maintaining a secure testing program such as planning and monitoring physical security the detection of group based cheating investigating misconduct and communicating about security related issues Part III

examines actual examples of cheating how the cheating was done how it was detected and the lessons learned Part III provides insight into security issues within each of the Association of Test Publishers four divisions certification licensure clinical educational and industrial organizational testing Part III s conclusion revisits the issues addressed in the case studies and identifies common themes Intended for organizations professionals educators policy makers researchers and advanced students that design develop or use high stakes tests this book is also ideal for graduate level courses on test development educational measurement or educational policy

The new European motorcycle test Great Britain: Parliament: House of Commons: Transport Committee,2010-03-23 In April 2009 a new testing regime based on the Second EU Driving Licence Directive was introduced Deadlines for implementation had not been met and when the new test was finally introduced it was met with intense criticism and safety concerns The number of tests taken dropped dramatically in the first few months and the industry suggested that the new test regime would threaten many small businesses and jobs The Committee was concerned to not only establish whether the test had gone wrong and how problems could be rectified but also to ensure lessons are learned before the implementation of the Third EU Driving Licence Directive They concluded that they could not see why the Government failed to obtain derogation from certain speed requirements and that though many elements of the new regime were appropriate it was important to take into account the concerns expressed and consider what adjustments might be required They also believe that training and instruction for the motorcycle test needs to develop and change to reflect the new test requirements The off road module of the test also needs to be amended to allow candidates to adapt their riding to reflect prevailing weather road and other circumstances The development of better awareness of motorcyclists among other road users is also crucial and should not be neglected Though the Government exceeded what was necessary to comply with the EU directive the Committee believes they were right to do so It is the development of Multi Purpose Test Sites for which justification was weak and implementation inept which represents the least effective element
