Today you will research an experiment involving elephants. First, you will read an article about the experiment. Then you will view a video and read a passage of the actual study. As you review these sources, you will gather information and answer questions about how the sources present information so you can write an analytical essay.

Read the article "Elephants Can Lend a Helping Trunk." Then answer the questions.

Elephants Can Lend a Helping Trunk

by Virginia Morell

1 Elephants know when they need a helping trunk—or rather trunk. That's the conclusion of a new study that tested the cooperative skills of Asian elephants (*Elephas maximus*) in Thailand and showed that the pachyderms understood that they will fail at a task without a partner's assistance. The ability to recognize that you sometimes need a little help from your friends is a sign of higher social cognition, psychologists say, and is rarely found in other species. Elephants now join an elite club of social cooperative chimpanzees, hyenas, meerkats, and humans.

2 To test the elephants' cooperative skills, a team of scientists modified a classic experiment first administered to chimpanzees in the 1930s, which requires two animals work together to earn a treat if they don't cooperate, neither gets the reward. For the elephants, the researchers used a sliding table with a single treat threaded

The High Stakes of Testing Amy L. Kelly,2019-05-07 Standardized assessments have long been part of the educative experience for students around the world The high stakes nature of these tests can have damaging and enduring effects for public school systems particularly the youth With the adoption of Common Core State Standards and mandated state wide accountability measures high stakes tests like the PARCC gained quick and controversial notoriety The high stakes discourse has been dominated by politicians educators and parents Notably absent from this dialogue are the voices of those whom are impacted the most students Largely influenced by Critical Pedagogy this research sheds light on the negative punitive and often arbitrary nature of testing in schools The paramount intention of this publication is to raise awareness of student experiences and perspectives of standardized testing The High Stakes of Testing analyzes the experiences relationships thoughts ideas and opinions

students have with standardized assessment measures Interviews with seven students in Grades 3 5 and 8 are examined through a governmentality lens to reveal the ways in which the youth are manipulated regulated and disciplined to view standardized testing as a natural part of what it means to be a public school student It is only when we can begin to see and appreciate how our youth interact with the omnipresent testing in our public schools can we begin to envision changing these accountability practices

should be affected by today s technology
