## **Parenting Counselling Activities:**

### **International Perspectives on Parenting Support and Parental Participation in Children and Family Services**

Carmel Devaney, Rosemary Crosse, 2023-09-08 This book provides an account of parenting support initiatives in children and family services from a number of jurisdictions paying particular attention to their impact on both hard and soft outcomes for participants and to the inclusion of parents in the design and delivery of these supports. By focusing on parents who are experiencing challenges outside of the normal day to day task of parenting and in receipt of formal support services their perspectives on the experience of receiving these supports and the difference experienced by children and family members are analysed. Conceptually driven and reflecting the individual theories and frameworks that underpinned the parenting supports, the participatory processes and the research undertaken, this book includes case studies from Australia, Bulgaria, England, Italy, Ireland, Northern Ireland, Norway, Poland, Portugal, Scotland, Serbia and Spain. By highlighting the theoretical, conceptual and practical considerations required when supporting parents in an inclusive manner, it will be of interest to all scholars, students and practitioners working in the following areas: social work and social care, child development, child protection and social policy.

**EMDR and Family Therapy** Debra Wesselmann, 2025-07-29 A practical guide to treating children suffering from early attachment trauma, now updated and revised. Loss of a parent, separations, abuse, neglect or a history of a difficult foster or orphanage experience can lead to profound emotional dysregulation in children. Working with these children can feel overwhelming for clinicians. But by integrating EMDR with family therapy, clinicians can strengthen parent-child attachment bonds and help to mend the early experiences that drive a traumatized child's behavior. This manual, an update to Debra Wesselmann's popular Integrative Team Treatment for Attachment Trauma in Children, provides clear step-by-step application of the Integrative Attachment Protocol for Children (IATP-C). In this treatment, psychoeducation assists parents in developing trauma-informed responses to their children's challenging behaviors, while family therapy and EMDR therapy deepen children's bonds with parents, improve self-awareness, self-regulation and self-worth, and assist children with making sense of their traumatic pasts. Any EMDR-trained clinician or any clinician pairing with an EMDR therapist can implement this treatment approach to heal suffering from attachment trauma and offer children and their families a better future.
