praticien est confronté trop souvent des malades atteints de parodontites si graves que les traitements conventionnels conduisent plus ou moins longue chance une ou plusieurs extractions. Les qualifier de refractaires n'apporte qu'une satisfaction relative aux patients qui en souffrent et au praticien quelquefois désespéré qui a fait le choix de les prendre en charge. Après que le premier livre Parodontologie clinique moderne de la littérature la réalité ait montré comment stopper efficacement l'évolution des parodontites, quelles qu'elles soient, ce deuxième volume décrit en détail une nouvelle technique capable de gagner et de maintenir des gains d'attache tels que les dents retrouvent leur solidité sans avoir recours des dispositifs de contention même lorsque le cas semble désespéré. Nos patients peuvent considérer alors avoir obtenu satisfaction puisqu'ils retrouvent pour longtemps le plaisir d'une bouche saine avec des dents fermement attachées aux maxillaires. Appliquée avec rigueur, la lithotritie parodontale donne rapidement aux patients la juste récompense de leurs efforts et aux praticiens motivés le goût de se consacrer à la parodontie à un coût humain et économique raisonnable.
