Personal Names in a Medieval Context Valéria Tóth, 2022-11-17 The book studies general name theoretical questions and universal features of personal name giving and also provides a description of the personal name system of the medieval Kingdom of Hungary The chapters on name theory introduce a cognitive pragmatic model that is suitable for the characterization of the anthroponym system of any language in any of its historical eras In the chapters discussing the features of old Hungarian personal name giving and usage we can find a specific application of the theoretical model The medieval Carpathian Basin provides an excellent opportunity for such an analysis for several reasons On the one hand because this region was at the crossroads of languages and cultures in the Middle Ages and this also clearly influenced its anthroponym systems On the other hand the time period under scrutiny the Middle Ages and more precisely the Old Hungarian Era between 895 and 1526 witnessed the restructuring of the name system on multiple levels including the appearance and ensuing dominance of personal names of a Latin origin as a result of the country becoming a Christian nation and the emergence of family names as a new personal name category The book also provides a detailed overview of the historical process in which personal name categories and personal name types were built and relied on one another Dieses Buch behandelt einerseits allgemeine namenstheoretische Fragen und universelle Charakteristika der Personennamengebung und Personennamenverwendung andererseits bietet es eine Beschreibung des Personennamensystems des Ungarischen Königreichs im Mittelalter In den namenstheoretischen Kapiteln wird ein kognitiv pragmatisches Beschreibungsmodell vorgestellt das für die Darstellung des Personennamensystems jedweder Sprache in all ihrer Epochen geeignet ist In den weiteren Kapiteln zu den Besonderheiten der alten ungarischen Personennamengebung und Personennamenverwendung ist die konkrete Anwendung des Beschreibungsmodells zu finden Das mittelalterliche Karpatenbecken bietet für eine solche Analyse ein ausgezeichnetes Untersuchungsfeld Zum einen galt diese Region als Sammelstelle von Sprachen und Kulturen im Mittelalter was natürlich auch in den Personennamensystemen seine Spur hinterlassen hat zum anderen ist die untersuchte Epoche das Mittelalter genauer die sogenannte altungarische Zeit 895
