Cottrell,2023-09-06 The 1994 Major League Baseball season promised to be memorable Long standing batting and pitching standards were threatened including the revered single season home run record The Montreal Expos and New York Yankees were delivering remarkable campaigns In August acting commissioner Bud Selig called a halt to the season amid the League s latest labor dispute The shutdown led to a lockout as well as cancellation of more than 900 regular season games the scheduled expanded rounds of playoffs and that year s World Series Like all labor struggles it was fundamentally about control of salaries of players ability to decide their own fates and of the game itself This book chronicles Major League Baseball s turbulent 94 season and its ripple effects It highlights earlier labor struggles and the roles performed by individuals from John Montgomery Ward David Fultz and Robert Murphy to Marvin Miller Andy Messersmith Jim Catfish Hunter and Donald Fehr Also examined are the ballplayers own organizations from the Players League of the early 1890s to the still potent Major League Baseball Players Association doing battle with team owners and their representatives *Finance, Law, and the Courts* Marco Lamandini,David Ramos Muñoz,2023-11-09 Law and courts are often neglected in finance The discipline is so permeated by economic analysis the enforcement of its rules so based on regulatory authorities that it often seems more natural to speak of financial regulation rather than financial law de emphasizing the role of courts Authored by leading experts in commercial law Finance Law and the Courts goes beyond this

limited perspective The book demonstrates that law and courts are essential in providing finance with the certainty it needs to operate and the elasticity it needs to evolve As explored in Part I of the book these benefits result from law s status as an interpretative construct formed by rules and principles a construct shaped by a need for consistency When principles collide courts are often called to solve hard cases and in doing so the Law of Finance evolves Examining such hard cases Parts II and III analyze courts roles in influencing finance s key concepts and principles For Public Law this includes the impact of sovereign immunity separation of powers or individual rights on the justiciability of financial acts central banks mandates and the interplay between regulatory concepts and fundamental rights For Private Law these include the foundations of liability for misstatements the validity and interpretation of financial contracts and creditor creditor conflict The book further explores the interplay between specialist and generalist courts and other bodies in Part IV concluding with a case for limited specialization of finance justice in the EU Offering a comprehensive legal treatment of finance s regulatory sources this book is an unparalleled resource for law academics practitioners and policymakers seeking to better understand the complex financial cases that they may encounter

Athens and Boiotia Roy van Wijk, 2024-01-25 Were Athenians and Boiotians natural enemies in the Archaic and Classical period The scholarly consensus is yes Roy van Wijk however re evaluates this commonly held assumption and shows that far from perpetually hostile their relationship was distinctive and complex Moving between diplomatic normative behaviour commemorative practice and the lived experience in the borderlands he offers a close analysis of literary sources combined with recent archaeological and epigraphic material to reveal an aspect to neighbourly relations that has hitherto escaped attention He argues that case studies such as the Mazi plain and Oropos show that territorial disputes were not a mainstay in diplomatic interactions and that commemorative practices in Panhellenic and local sanctuaries do not reflect an innate desire to castigate the neighbour The book breaks new ground by reconstructing a more positive and polyvalent appreciation of neighbourly relations based on the local lived experience This title is available as Open Access on Cambridge Core

Reconsidering Policy Kate Crowley, Jenny Stewart, Adrian Kay, Brian W. Head, 2021-08-11 For nation states the contexts for developing and implementing policy have become more complex and demanding Yet policy studies have not fully responded to the challenges and opportunities represented by these developments Governance literature has drawn attention to a globalising and network based policy world but politics and the role of the state have been de emphasised This book addresses this imbalance by reconsidering traditional policy analytic concepts and re developing and extending new ones in a melded approach defined as systemic institutionalism This links policy with governance and the state and suggests how real world issues might be substantively addressed *Osiris, Volume 39* Jaipreet Viridi, Mara Mills, Sarah F. Rose, 2024-09-02 Presents a powerful new vision of the history of science through the lens of disability studies Disability has been a central if unacknowledged force in the history of science as in the scientific disciplines Across historical epistemology and laboratory research disability has been good to think with an object of investigation made to yield generalizable truths Yet disability is

rarely imagined to be the source of expertise especially the kind of expertise that produces rational neutral universal scientific knowledge This volume of *Osiris* places disability history and the history of science in conversation to foreground disability epistemologies disabled scientists and disability sciencing engagement with scientific tools and processes Looking beyond paradigms of medicalization and industrialization the volume authors also examine knowledge production about disability from the ancient world to the present in fields ranging from mathematics to the social sciences resulting in groundbreaking histories of taken for granted terms such as impairment infirmity epidemics and sh gai Some contributors trace the disabling impacts of scientific theories and practices in the contexts of war factory labor insurance and colonialism others excavate racial and settler ableism in the history of scientific facts protocols and collections still others query the boundaries between scientific lay and disability expertise Contending that disability alters method authors bring new sources and interpretation techniques to the history of science overturn familiar narratives apply disability analyses to established terms and archives and discuss accessibility issues for disabled historians The resulting volume announces a disability history of science
