*The Pontifical Biblical Institute* Maurice Gilbert,2009 Established in accordance with the wish of Pope Pius X at the suggestion of Fr Leopold Fonck S J and straightway entrusted to the Society of Jesus the Pontifical Biblical Institute celebrates its centenary in 2009 Its main centre is in the heart of Rome It has a subsidiary branch in Jerusalem since 1927 Telling the story of this specialized university institution is in a way recalling the stages through which biblical exegesis has passed in the course of that century Based on documents from archives eighty of which are reproduced this circumstantial account retraces step by step the important periods the Institute has lived through in Rome then in Jerusalem

*The History of Courts and Procedure in Medieval Canon Law* Wilfried Hartmann,Kenneth Pennington,2016-09-09 By the end of the thirteenth century court procedure in continental Europe in secular and ecclesiastical courts shared many characteristics As the academic jurists of the *Ius commune* began to excavate the norms of procedure from Justinian's great codification of law and then to expound them in the classroom and in their writings they shaped the structure of ecclesiastical courts and secular courts as well These essays also illuminate striking differences in the sources that we find in different parts of Europe In northern Europe the archives are rich but do not always provide the details we need to understand a particular case In Italy and Southern France the documentation is more detailed than in other parts of Europe but here too the historical records do not answer every question we might pose to them In Spain detailed documentation is strangely lacking if not altogether absent Iberian conciliar canons and tracts on procedure tell us much about practice in Spanish courts As these essays demonstrate scholars who want to peer into the medieval courtroom must also read letters papal decretals chronicles conciliar canons and consilia to provide a nuanced and complete picture of what happened in medieval trials This volume will give sophisticated guidance to all readers with an interest in European law and courts

**Monastic Tithes** Giles Constable,1964-01-03 No tax in Europe can compare with tithes in its duration the extent of its application and the economic burden it imposed In this study Professor Constable considers the tithes paid to and by monks in the Middle Ages In particular he examines why by the twelfth century most monks received tithes and many of them were freed from payment in spite of earlier theory and practice by which monks as distinct from the clergy were usually forbidden to receive tithes and required to pay them In the early Middle Ages monastic tithes were a matter not only of economics but of doctrine canon law and monastic theory Their history lies in the borderland between theory and practice and Professor Constable studies them against a background of changes in property relationships in the theory of tithing and in the nature of the monastic order

*Naples and Napoleon* John A.

Davis,2008-12-18 In Naples and Napoleon John Davis takes the southern Italian Kingdom of the Two Sicilies as the vantage point for a sweeping reconsideration of Italy's history in the age of Napoleon and the European revolutions The book's central themes are posed by the period of French rule from 1806 to 1815 when southern Italy was the Mediterranean frontier of Napoleon's continental empire The tensions between Naples and Paris made this an important chapter in the history of that empire and revealed the deeper contradictions on which it was founded But the brief interlude of Napoleonic rule later came to be seen as the critical moment when a modernizing North finally parted company from a backward South Although these arguments still shape the ways in which Italian history is written in most parts of the North political and economic change before Unification was slow and gradual whereas in the South it came sooner and in more disruptive forms Davis develops a wide ranging critical reassessment of the dynamics of political change in the century before Unification His starting point is the crisis that overwhelmed the Italian states at the end of the 18th century when Italian rulers saw the political and economic fabric of the Ancien R gime undermined throughout Europe In the South the crisis was especially far reaching and this Davis argues was the reason why in the following decade the South became the theatre for one of the most ambitious reform projects in Napoleonic Europe The transition was precarious and insecure but also mobilized political projects and forms of collective action that had no counterparts elsewhere in Italy before 1848 illustrating the similar nature of the political challenges facing all the pre Unification states Although Unification finally brought Italy's insecure dynastic principalities to an end it offered no remedies to the insecurities that from much earlier had made the South especially vulnerable to the challenges of the new age which was why the South would become a problem Italy's Southern Problem
