The Complete Resource on Pediatric Office Emergency Preparedness Rohit Shenoï,Faria Pereira,Joyce Li,Angelo P. Giardino,2013-06-01 This book describes key knowledge concepts skills and up to date algorithms pertaining to common emergencies that can take place in a pediatric office including seizures anaphylaxis and shock and diabetic ketoacidosis The authors supported by peer review from top specialists in Pediatric Emergency Medicine at the Baylor College of Medicine offer the first comprehensive educational resource on pediatric office emergency preparedness

devoted exclusively to the practicing primary care health care provider and his/her team. During emergencies, providers and their staff are called on to work efficiently as a code team, which is a source of considerable apprehension for many primary care pediatricians. This unique reference guide contains a wealth of information and resources in a compact and practical form. It presents the most important knowledge, skills, office resources, and team interactions required by practitioners to successfully treat pediatric emergencies in the office.

Pediatric Advanced Life Support Study Guide Barbara Aehlert, 2007. Updated to reflect the new 2005 emergency cardiovascular care guidelines. Popular author Barbara Aehlert incorporates both prehospital and hospital management of pediatric emergencies. In a concise, easy-to-read outline format, it provides the most essential information a provider needs. It is also the approved text for the American Safety course. Contact your sales representative for details. An outline format featuring bulleted lists, concise tables, and a user-friendly writing style makes this comprehensive text incredibly easy to read and understand. A Pretest and a Posttest consisting of multiple choice, true/false, fill-in-the-blank, and essay questions test readers' overall comprehension of the material. Updated to reflect the new 2005 emergency cardiovascular care guidelines. PALS Pearl Boxes help readers apply information covered in the text to real-life clinical situations. Sidebars contain additional information relevant to the topics covered in the chapter, giving readers an opportunity for further learning. A laminated quick reference card gives practitioners easy access to critical information in the field or hospital. This convenient card includes essential information regarding respiratory and heart rates, blood pressure, basic life support interventions, Glasgow Coma Scale, airway size, and equipment selection for intubation corresponding to the Broselow Resuscitation Tape, several pediatric algorithms, and pain assessment tools.

Core Curriculum for Pediatric Emergency Nursing Bruce Herman, Emergency Nurses Association, 2003. This unique text serves as the foundation for pediatric emergency nursing practice and also addresses pediatric trauma care.
