Psychiatric Final Exam Study Guide:

Geriatric Psychiatry Review and Exam Preparation Guide Mark Rapoport, Andrew Wiens, Dallas Seitz, Evan Lilly, 2017-01-06 Geriatric psychiatry is a relatively young discipline within the field of North American psychiatry. The development of a workforce to meet the needs of an aging population has been identified as an urgent priority but there is still much we don't know about fulfilling the mental health needs of older adults. For Mark J Rapoport, geriatric psychiatrists must assess and treat patients today in face of the limitations of what we know but also be armed with enthusiasm to create novel ways of impacting on the quality of life of older patients with mental illness. The chapters in this book include case scenarios, concise point form summaries of diagnostic and treatment approaches up to date, evidence syntheses, discussions of controversies, and a series of practical and thought provoking questions and answers. Geriatric Psychiatry is a succinct and advanced review of geriatric psychiatry that will help clinicians improve the psychiatric care of an aging population.

Psychiatry Review and Canadian Certification Exam Preparation Guide James Bourgeois, Usha Parthasarathi, Ana Hategan, 2012 The first comprehensive psychiatry review textbook designed expressly for the Canadian market. Psychiatry Review and Canadian Certification Exam Preparation Guide is the resource residents and psychiatrists need to master the qualifying examinations in psychiatry of the Royal College of Physicians and Surgeons of Canada. These exams are required for certification both for graduating residents and most foreign trained psychiatrists seeking to practice in Canada. This new volume based on The American Psychiatric Publishing Board Review Guide for Psychiatry has been carefully edited to include only material relevant to the Canadian exam. References have been taken from both the U.S. and Canadian psychiatric literature and laboratory units, medication names and doses, and the language used have been edited to be consistent with Canadian psychiatry. The volume takes the reader from the basic sciences comprising the foundation of psychiatry through the psychiatric interview and other diagnostic topics to syndrome specific chapters paralleling DSM IV TR and finally to current treatment options. Rounding out the review is a 200 question practice exam that reflects the structure of the actual board examinations. Although no substitute for quality medical and residency training, Psychiatry Review and Canadian Certification Exam Preparation Guide will help the prospective exam taker ameliorate weaknesses and enhance strengths in preparation for a successful exam experience.

Child and Adolescent Psychiatry in Europe Helmut Remschmidt, Herman van Engeland, 2012-12-06. The intention of this book is to provide an overview of child and adolescent psychiatry in Europe, focusing on the historical development, current situation, and future perspectives of the specialty. Child and adolescent psychiatry is now acknowledged as a medical specialty or subspecialty in almost all European countries. Also, the number of child psychiatrists has increased dramatically over the last decade. However, there are still enormous differences from country to country, not only with regard to the number of specialists but also with regard to the extent and nature of services provided and their diagnostic and therapeutic orientation. Furthermore, important differences exist in the training curricula for child and adolescent psychiatry within medicine and other professional fields, both inside and outside the universities, and in the image and importance of this discipline to the public. This diversity is also reflected in the reports on the historical development, current situation, and future perspectives of child and adolescent psychiatry in 31 European countries, all following the same structure in order to facilitate comparability. This structure comprises: 1. the historical development and the current situation; 2. classification systems and diagnostic and therapeutic methods; 3. structure and organization of services; 4. cooperation with other medical and non-medical disciplines; 5. training and continuing medical education; 6. research; and 7. future perspectives.
