Final Solutions Benjamin A. Valentino, 2013-01-19 Benjamin A. Valentino finds that ethnic hatreds or discrimination undemocratic systems of government and dysfunctions in society play a much smaller role in mass killing and genocide than is commonly assumed. He shows that the impetus for mass killing usually originates from a relatively small group of powerful leaders and is often carried out without the active support of broader society. Mass killing in his view is a brutal political or military strategy designed to accomplish leaders' most important objectives: counter threats to their power and solve their most difficult problems. In order to capture the full scope of mass killing during the twentieth century, Valentino does not limit his analysis to violence directed against ethnic groups or to the attempt to destroy victim groups as such as do most previous studies of genocide. Rather, he defines mass killing broadly as the intentional killing of a massive number of noncombatants using the criteria of 50,000 or more deaths within five years as a quantitative standard. *Final Solutions* focuses on three types of mass killing: communist mass killings like the ones carried out in the Soviet Union, China, and Cambodia; ethnic genocides as in Armenia, Nazi Germany, and Rwanda; and counter guerrilla campaigns including the brutal civil war in Guatemala and the Soviet occupation of Afghanistan. Valentino closes the book by arguing that attempts to prevent mass killing should focus on disarming and removing from power the leaders and small groups responsible for instigating and organizing the killing.

The Banality of Good and Evil David R. Blumenthal, 1999-04-05 People who helped exterminate Jews during the Shoah, Hebrew for Holocaust, often claimed that they only did what was expected of them. Intrigued by hearing the same response from individuals who rescued Jews, David R. Blumenthal proposes that the notion of ordinariness used to characterize Nazi evil is equally applicable to goodness. In this provocative book, Blumenthal develops a new theory of human behavior that identifies the social and psychological factors that foster both good and evil behavior. Drawing on lessons primarily from the Shoah but also from well-known obedience and altruism experiments, Milgram and the civil rights movement, Blumenthal deftly interweaves insights from psychology, history, and social theory to create a new way of looking at human behavior. Blumenthal identifies the factors: social hierarchy, education, and childhood discipline that shape both good and evil attitudes and actions. Considering how our religious and educational institutions might do a better job of encouraging goodness and discouraging evil, he then makes specific recommendations for cultivating goodness in people, stressing the importance of the social context of education. He reinforces his ideas through stories, teachings, and case histories from the Jewish tradition that convey important lessons in resistance and goodness. Appendices include the ethical code of the Israel Defense Forces, material on non-violence from the Martin Luther King Jr. Center, a suggested syllabus for a Jewish elementary school, and a list of prosocial sources on the Web, as well as a complete bibliography. If people can commit acts of evil without thinking why, can't they even more readily commit acts of kindness? Writing with power and insight, Blumenthal shows readers of all faiths how we might replace patterns of evil with empathy, justice, and caring, and through a renewed attention to moral education, perhaps prevent
