Howard, 1990-02-28 This 5 volume set allows you to assess the health and environmental effects of chemicals by determining the routes of exposure of the chemical to sensitive organisms Environmental Fate and Exposure of Organic Chemicals provides relevant facts on how individual chemicals behave in the environment and how humans and environmental organisms are exposed to the chemicals during their production rise transport and disposal Each chemical is prepared by one of the best known organizations in environmental fate and exposure and is peer reviewed by a panel of expert scientists The information on each chemical includes all experimental values and references for physical properties all chemical fate studies and all available monitoring data and interpretative summaries **Advances in Modeling and Management of Urban Water Networks** Alberto Campisano, Enrico Creaco, 2021-01-06 The Special Issue on Advances in Modeling and Management of Urban Water Networks UWNs explores four important topics of research in the context of UWNs asset management modeling of demand and hydraulics energy recovery and pipe burst identification and leakage reduction In the first topic the multi objective optimization of interventions on the network is presented to find trade off solutions between costs and efficiency In the second topic methodologies are presented to simulate and predict demand and to simulate network behavior in emergency scenarios In the third topic a methodology is presented for the multi objective optimization of pump as turbine PAT

installation sites in transmission mains In the fourth topic methodologies for pipe burst identification and leakage reduction are presented As for the urban drainage systems UDSs the two explored topics are asset management with a system upgrade to reduce flooding and modeling of flow and water quality with analyses on the transition from surface to pressurized flow impact of water use reduction on the operation of UDSs and sediment transport in pressurized pipes The Special Issue also includes one paper dealing with the hydraulic modeling of an urban river with a complex cross section The Book Buyer's Manual G.P. Handbook of Environmental Fate and Exposure Data For Organic Chemicals, Volume II Philip H. Howard,2023-05-09 This 5 volume set allows you to assess the health and environmental effects of chemicals by determining the routes of exposure of the chemical to sensitive organisms Environmental Fate and Exposure of Organic Chemicals provides relevant facts on how individual chemicals behave in the environment and how humans and environmental organisms are exposed to the chemicals during their production rise transport and disposal Each chemical is prepared by one of the best known organizations in environmental fate and exposure and is peer reviewed by a panel of expert scientists The information on each chemical includes all experimental values and references for physical properties all chemical fate studies and all available monitoring data and interpretative summaries *Land and Water Degradation in Ethiopia* Assefa M. Melesse,Mekdelawit M. Deribe,Ethiopia B. Zeleke,2024-08-05 Water is life for all human beings and is essential for sustainable economic development Access to freshwater is a fundamental human right Ensuring access to safe drinking water and sanitation is vital for economic growth poverty reduction and enhancement of human well being Yet uncertain global water availability compounded by factors such as climate change and land degradation have made meeting the growing water demand a daunting task for many communities The world is facing an unprecedented climate crisis intricately linked with water resources We have witnessed frequent and intense hydrologic extremes floods and droughts In the past decade alone floods storms droughts and other weather related events accounted for over 90% of natural disasters Water being at the center of national policies of many countries the impact of climate change on water resources extends across multiple sectors including energy production food security health environmental conservation and economic development Research has shown that climate change has impacted the hydrologic cycle affected the availability and predictability of water and hence threatened the efforts of poverty reduction and economic development These impacts are more pronounced in developing countries exacerbating existing socioeconomic challenges and hindering progress towards self sufficiency in food water and energy production The impact of climate change on these countries is further aggravated by land degradation land use changes unsustainable agricultural practices poor watershed management and ecological degradation and loss of biodiversity This book aims to explore these issues with chapters dedicated to examining land and water degradation water quality irrigation groundwater management land use dynamics and the impacts of climate change on freshwater resources in Ethiopia **Hydrological Modeling** Ramakar Jha,V. P. Singh,Vivekanand Singh,L. B.

Roy, Roshni Thendiyath, 2022-02-05 This book carefully considers hydrological models which are essential for predicting floods droughts soil moisture estimation land use change detection geomorphology and water structures The book highlights recent advances in the area of hydrological modelling in the Ganga Basin and other internationally important river basins The impact of climate change on water resources is a global concern Water resources in many countries are already stressed and climate change along with burgeoning population rising standard of living and increasing demand are adding to the stress Furthermore river basins are becoming less resilient to climatic vagaries Fundamental to addressing these issues is hydrological modelling which is covered in this book Integrated water resources management is vital to ensure water and food security Integral to the management is groundwater and solute transport and this book encompasses tools that will be useful to mitigate the adverse consequences of natural disasters
