Rawlings, Maurice Rawlings, 2008-11 Barring devastating accidents and disseminated cancer man usually dies because of the failure of just one organ Theoretically through progressive replacement of failing organs man could live forever and veritably spout the fountain of youth for the first time in history However a critical four hour survival time between organ donor and recipient is a limiting factor for making organ replacement feasible To start the fountain flowing to offer transplantation on demand and to anticipate over flowing demands would require one of the greatest discoveries of the decade a simple means for organ preservation Through meticulous research and happenstance Dr Frederick Middleton does indeed discover a unique freeze dry formula to preserve organs without fracturing the cell walls so invariably typical of any freezing or thawing process But as with all things good a profiteering underworld soon corrupts the organ exchange business garnering fortunes from trusting recipients who hopefully would give most anything they own for one just more fling at life Within this milieu this struggle for life lies a stream of patients whose heart rending stories question traditional concepts for dealing with the dying **UPDATED BIOGRAPHICAL INFORMATION** Maurice S Rawlings M D Physician to President Dwight Eisenhower Physician to Joint Chiefs of Staff Assoc Clinical Professor of Medicine Univ of Tennessee National Teaching Faculty American Heart Association Medical Director Aventis and ZLB Bio science Laboratories Author of *Beyond Death's Door* *Before Death Comes Life Wish* and *To Hell and Back* Multiple languages The first and last publications were also made into movies Fellow American Colleges of Cardiology Angiology and Chest Physicians Diplomat American Board of Cardiology Chairman TVA Medical Retirement Board Pilot Instrument Multi engine *How to Live*

**Should You Choose to Live Forever?** Stephen Cave, John Martin Fischer, 2023-11-22 In this book Stephen Cave and John Martin Fischer debate whether or not we should choose to live forever This ancient question is as topical as ever while billions of people believe they will live forever in an otherworldly realm billions of dollars are currently being poured into anti ageing research in the hope that we will be able to radically extend our lives on earth But are we wise to wish for immortality What would it mean for each of us as individuals for society and for the planet In this lively and accessible debate the authors introduce the main arguments for and against living forever along with some new ones They draw on examples from myth and literature as well as new thought experiments in order to bring the arguments to life Cave contends that the aspiring immortalist is stuck on the horns of a series of dilemmas such as boredom and meaninglessness or overpopulation and social injustice Fischer argues that there is a vision of radically longer lives that is both recognizably human and desirable This book offers both students and experienced philosophers a provocative new guide to a topic of perennial importance

**Key Features** Gives a comprehensive overview of the main arguments for and against living forever Uses lively examples from myth literature and novel thought experiments Highly accessible avoiding jargon and assuming no prior knowledge without sacrificing intellectual rigour Includes helpful pedagogical features including chapter summaries an annotated reading list a glossary and clear examples
