ORIGINS OF THE MUTAPA STATE.

It is a matter of controversy amongst scholars. Various theories were put forward to trace where this state originated from. Nevertheless not withstanding the efforts of the scholars, this issue remains a thorn in the flesh.

To start with , Moyana, S.L.G. Mudenge and S. Mukanya supports the salt expedition theory. The scholars suggest that the state was found around 1400 AD by Nyatsimba Mutota who was an heir to the Great Zimbabwe Kingdom. It is said that after a severe salt shortage at Great Zimbabwe, Nyatsimba was sent by his father to look for areas where the state could look for salt. After leaving with a group of men, he is said to have scoured around the country until he reached the Northern Plateau near the modern day Mutema. Tired of the expedition Nyatsimba was reluctant to return to Great Zimbabwe, thus with the help of his companions he established the state by incorporating defeated states in the area, thus these three scholars agree that the Mutapa state was formed as a result of the search for salt. Although the suggestion can be accepted in explaining the origins of the Mutapa state, the theory suffers many weaknesses, the weaknesses brought about by D.N. Beach who bases his argument on the following reasons;

1. Nyatsimba Mutota was not the founder of the state, if he founded it he did it so to an already existing state.
2. The fact that it is said that he incorporated defeated states is refutable, Beach wonders how he could vanquish those states while he was accompanied by few men.
3. He argues that Shona Kings were highly respected and so were their sons. So how could a royal descendant be sent on a salt expedition.

The arguments of Beach hold much water in refuting the credibility of the salt expedition theory. Nevertheless one wishes to highlight that those arguments of Beach are dressed with weaknesses, erroneous and far fetched. In reference to his first argument that Nyatsimba was not the founder of the

Working as Indigenous Archaeologists George Nicholas,Joe Watkins,2024-09-30 Working as Indigenous Archaeologists explores the often contentious relationship between Indigenous and other formerly colonized peoples and Archaeology through their own voices Over the past 35 plus years the once novel field of Indigenous Archaeology has become a relatively familiar part of the archaeological landscape It has been celebrated criticized and analyzed as to its practical and theoretical applications and its political nature No less important are the life stories of its Indigenous practitioners What has brought some of them to become practicing archaeologists or heritage managers What challenges have they faced from both inside and outside their communities And why haven t more pursued Archaeology as a vocation or avocation This volume is a collection of 60 autobiographical chapters by Indigenous archaeologists and heritage specialists from around the world some community based some academic some in other realms who are working to connect past and present in meaningful and especially personal ways As Archaeology continues to evolve there remain strong tensions between an objective science oriented evidentiary based approach to knowing the past and a more subjective relational humanistic approach informed by local values traditional knowledge and holistic perspective While there are no maps for these new territories hearing directly from those Indigenous individuals who have pursued Archaeology reveals the pathways taken Those stories will provide inspiration and confidence for those curious about what lies ahead This is an important volume for anyone interested in the present state and future of the archaeological discipline 'Africa Forms the Key' Suryakanthie Chetty,2021-01-04 This book examines the work of prominent South African geologist Alex Du Toit as a means of understanding the debate around continental drift both in segregation era South Africa and internationally It contextualises Du Toit s work within a particularly formative period of South African science from the paleoanthropological discoveries that sparked debates about the origins of humankind to Jan Smuts own theory of holism Beyond South African scientific discoveries the book sets Du Toit

s work against a backdrop of ideological struggles over space both domestically in terms of segregation and nationalism as well as internationally as South Africa sought to assert its position within the Commonwealth These debates were embodied by Du Toit s work on the theory of continental drift which put Africa and South Africa at the centre geologically and geographically The author also focuses on the divisions in geology caused by drift theory tracing the vigorous intellectual debate and dissent indicative of the ideological milieu within which scientific thought is constructed It traces the history of continental drift from its inception in the nineteenth century and later work of Alfred Wegener which was both elaborated upon and substantiated by Du Toit The study further focuses on Du Toit s research on continental drift in South African and South America and the geological fossil and climatological evidence used to bolster this theory **The Historical**
