A. Sannasiraj,V. Sriram,Manta Devi Nowbuth,2020-11-08

This book comprises the proceedings of the Fifth International Conference in Ocean Engineering ICOE2019 focusing on emerging opportunities and challenges in the field of ocean engineering and offshore structures Some of the themes covered in this volume are offshore structures and deepwater technology ocean optics acoustics ocean renewable energy marine spatial planning climate change impacts disaster risk reduction etc The essays are written by leading international experts making it a valuable resource for researchers and practicing engineers alike *Multi-Criteria Decision Making in Maritime Studies and Logistics* Paul Tae-Woo Lee,Zaili Yang,2017-10-24 This book describes a wide range real case applications of Multi Criteria Decision Making MCDM in maritime related subjects including shipping port maritime logistics cruise ports waterfront developments and shipping finance etc In such areas researchers students and industrialists in general felt struggling to find a step by step guide on how to apply MCDM to formulate effective solutions to solving real problems in practice This book focuses on the in

depth analysis and applications of the most well known MCDM methodologies in the aforementioned areas It brings together an eclectic collection of twelve chapters which seek to respond to these challenges The book begins with an introduction and is followed by an overview of major MCDM techniques The next chapter examines the theory of analytic hierarchy process AHP in detail and investigates a fuzzy AHP FAHP approach and its capability and rationale in dealing with decision problems of ambiguous information Chapter 4 proposes a generic methodology to identify the key factors influencing green shipping and to establish an evaluation system for the assessment of shipping greenness In Chapter 5 the authors describe a new function of fuzzy Evidential Reasoning ER to improve the vessel selection process in which multiple criteria with insufficient and ambiguous information are evaluated and synthesized Chapter 6 presents a novel methodology by using an Artificial Potential Field APF model and the ER approach to estimate the collision probabilities of monitoring targets for coastal radar surveillance Chapter 7 develops the inland port performance assessment model IPPAM using a hybrid of AHP ER and a utility function The next chapter showcases a challenging approach to address the risk and uncertainty in LNG transfer operations by utilizing a Stochastic Utility Additives UTA method with the help of the philosophy of aggregation disaggregation coupled with a robustness control procedure Chapter 9 uses Entropy and Grey Relation Analysis GRA to analyze the relative weights of financial ratios through the case studies of the four major shipping companies in Korea and Taiwan Evergreen Yang Ming Hanjin and Hyundai Merchant Marine Chapter 10 systemically applies modern heuristics to solving MCDM problems in the fields of operation optimisation in container terminals Arguing that bunkering port selection is typically a multi criteria group decision problem and in many practical situations decision makers cannot form proper judgments using incomplete and uncertain information in an environment with exact and crisp values in Chapter 11 the authors propose a hybrid Fuzzy Delphi TOPSIS based methodology with a sensitivity analysis Finally Chapter 12 deals with a new conceptual port performance indicators PPIs interdependency model using a hybrid approach of a fuzzy logic based evidential reasoning FER and a decision making trial and evaluation laboratory DEMATEL

Marine Mammal Welfare Andy Butterworth,2017-06-19 Marine mammals attract human interest sometimes this interest is benign or positive whale watching conservation programmes for whales seals otters and efforts to clear beaches of marine debris are seen as proactive steps to support these animals However there are many forces operating to affect adversely the lives of whales seals manatees otters and polar bears and this book explores how the welfare of marine mammals has been affected and how they have adapted moved responded and sometimes suffered as a result of the changing marine and human world

around them Marine mammal welfare addresses the welfare effects of marine debris of human traffic in the oceans of noise of hunting of whale watching and tourism and of some of the less obvious impacts on marine mammals on their social structures on their behaviours and migration and also of the effects on captivity for animals kept in zoos and aquaria There is much to think and talk about how marine mammals respond in a world dramatically influenced by man how are their social structures affected and how is their welfare impacted

Marine Analytical Chemistry Julián Blasco, Antonio Tovar-Sánchez, 2022-11-03 This textbook offers a comprehensive and authoritative introduction to the latest analytical methods tools and techniques used in the marine environment bringing together the two fields of chemical oceanography and analytical chemistry Divided into 11 chapters the book starts with an overview of the main parameters of the marine carbon system and it covers different sampling strategies used by the marine scientific community and the different chemical analyses to measure trace metals radionuclides and organic matter in the marine environment Particular attention is given to the identification and quantification of marine persistent organic pollutants emerging organic contaminants and microplastics Readers will also find accessible explanations and real life examples of the application of remote sensing and in situ sensing technologies to monitor the marine environment The textbook finishes with a chapter on data treatment that outlines the relevant statistical approaches uncertainty estimation and quality assurance of marine chemical measurements This textbook provides both students and professionals alike with a transdisciplinary and comprehensive foundation for the chemical analysis of our oceans and seas

Global Ecology and Oceanography of Harmful Algal Blooms Patricia M. Glibert, Elisa Berdalet, Michele A. Burford, Grant C. Pitcher, Mingjiang Zhou, 2018-04-26 Harmful algal blooms HABs blooms that cause fish kills contaminate seafood with toxins or cause human or ecological health impacts and harm to local economies are occurring more often in more places and lasting longer than in past decades This expansion is primarily the result of human activities through increased nutrient inputs and various aspects of climate change The Global Ecology and Oceanography of Harmful Algal Blooms GEOHAB programme promoted international collaboration to understand HAB population dynamics in various oceanographic regimes and to improve the

prediction of HABs This volume introduces readers to the overarching framework of the GEOHAB programme factors contributing to the global expansion of harmful algal blooms the complexities of HABs in different habitats and the forward looking issues to be tackled by the next generation of GEOHAB GlobalHAB The programme brought together an international team of contributing scientists and ecosystem managers and its outcomes will greatly benefit the international research community

Biological Sampling in the Deep Sea Malcolm R. Clark, Mireille Consalvey, Ashley A. Rowden, 2016-04-18 The deep sea covers over 60% of the surface of the earth yet less than 1% has been scientifically investigated There is growing pressure on deep sea resources and on researchers to deliver information on biodiversity and the effects of human impacts on deep sea ecosystems Although scientific knowledge has increased rapidly in recent decades there exist large gaps in global sampling coverage of the deep sea and major efforts continue to be directed into offshore research Biological Sampling in the Deep Sea represents the first comprehensive compilation of deep sea sampling methodologies for a range of habitats It reviews the real life applications of current and in some instances developing deep sea sampling tools and techniques In creating this book the authors have been able to draw upon the experiences of those at the coal face of deep sea sampling expanding on the existing methodological texts whilst encompassing a level of technical detail often omitted from journal publications Ultimately the book will promote international consistency in sampling approaches and data collection advance the integration of information into global databases and facilitate improved data analyses and consequently uptake of science results for the management and conservation of the deep sea environment The book will appeal to a range of readers including students early career through to seasoned researchers as well as environmental managers and policy makers wishing to understand how the deep sea is sampled the challenges associated with deep survey work and the type of information that can be obtained
