Cases* Jan vom Brocke,Alan Hevner,Alexander Maedche,2020-09-23 Design Science Research is a powerful paradigm enabling researchers to make important contributions to society and industry Simply stated the goal of DSR is to generate knowledge on how to find innovative solutions to important problems in the form of models methods constructs and instantiations Over the past 20 years the design science research DSR paradigm has developed into an established paradigm in Information Systems Research and it is of strong uptake in many other disciplines including Management Science and Computer Science This book provides a collection of twelve DSR cases presented by experienced researchers in the field It offers readers access to real world DSR studies together with the authors reflections on their research processes These cases will support researchers who want to engage in DSR and represent a valuable addition to existing introductions to DSR methods and processes Readers will learn from the hands on experiences of respected experts who have conducted extensive DSR in a range of application contexts      **Research in Education** ,1973      *The Oxford Handbook of Undergraduate Psychology Education* Dana Dunn,2015 The Oxford Handbook of Undergraduate Psychology Education provides psychology educators administrators and researchers with up to date advice on best teaching practices course content teaching methods and classroom management strategies student advising and professional and administrative issues      *The Routledge Handbook on the Influence of Built Environments on Diverse Childhoods* Kate Bishop,Katina Dimoulas,2024-07-01 Children and young people are often discussed as if they are homogenous groups The reality is of course very different with an enormous

variation within each of these groups and in any domain of experience pertaining to childhood or adolescence Driven by personal sociocultural geographic or economic circumstances many children and young people worldwide are experiencing a totally different reality to those who fit with more mainstream patterns of childhood This has substantial implications for their sociophysical environmental experience and our understanding of their physical environmental needs The aim of this book is to draw attention to these alternate realities for a number of these groups of children and young people highlighting the unique and different considerations associated with their particular circumstances in each instance and identifying the repercussions for their physical environmental needs Ultimately this book creates an evidence based discussion which can be used by designers planners and policy makers and those delivering services and programs to children and young people as a basis to make informed decisions on how to work with the groups of children and young people in our book for better environmental provision

*LEADERSHIP AND ORGANISATIONAL PERFORMANCE* Dr. Godwin C. Arikibe, 1901 Leadership is inherent in every being despite one's job profile But qualitative training and other traits are very important for the right behaviours Every follower possesses attribute of a leader but because these are somewhat concealed to lead effectively becomes a huge challenge to many This book is as a result of many years of research It focused on discovering those behavioural attributes

that could combine effectively with the leader's competing roles to enhance his performance. A Competing Value Framework (CVF) was applied to understand the leadership behaviours, characteristics, attributes, and roles that could influence a leader even in the face of contingency factors. The result was quite revealing. Leaders that combine their roles with other attributes and skills achieve behavioural complexity, which are performance-enhancing behaviours. Furthermore, leaders are distinguished by their unique mental attitude, particularly in four roles they play: motivation, vision, analytic, and task master roles. Combination of these with other attributes and characteristics enhances the leadership complexity. This book is a useful material for those in the ministries, academia, and organisations of different sizes. It is a book every leader must possess to comprehend the behavioural complexities relevant for organisational performance. Selected Water Resources Abstracts, 1990-07
