

The background of the cover features a green-to-blue gradient with a faint, glowing molecular lattice pattern. A chemical reaction scheme is depicted in the upper half. It shows a complex organic molecule on the left, which is a substituted cyclohexane with a phenyl group and a long chain ending in a carboxylic acid. This molecule is shown reacting with a central metal complex, likely a transition metal with two chlorine atoms and two other ligands. An arrow points from this complex to a second, more complex organic molecule on the right, which appears to be a polycyclic or macrocyclic structure with various functional groups. The overall theme is organometallic chemistry.
