

## **TRANSPORTATION PROPOSAL FOR 2021-2022 SCHOOL YEAR**

Re: Suggested modification of enrollment procedures to improve transportation services.

To: USD #469 Board of Education and Superintendent Dan Wessel

From: Jim Slapper, Transportation Services Director

Date: March 8, 2021

This proposal will specify past transportation service concerns and suggest modifications to help resolve those issues and better provide transportation for eligible students.

### **Goals**

1. Increase safety for all students transported.
2. Better communication between parents and school staff pertaining to transportation.

### **Historical Overview:**

Enrollment procedures result in a significant distortion of the number of students entitled to/needings/prepared to utilize transportation services. In the past, the number of students requesting services at time of enrollment has been skewed much higher than students utilize our transportation service.

Under such circumstances, transportation services have experienced serious problems planning for the number of students to be transported, appropriate bus stop locations and allocation of transportation staff and material resources and planning. Currently all enrolled students are entitled to free transportation services except for those specifically excluded by policy. Those not eligible include students within a walk zone and students residing out-of-district.

### **2019-2020 School Year Experience:**

During the school enrollment process form on Skyward, parents can mark a box if they believe their student needs transportation services. Parents enrolling their students for transportation services can do so at any time before and after the first day of school. There is no cutoff date.

During the 2019-2020 school year enrollment process, 1,774 students were checked yes as needing and/or wanting transportation services. Included in that number were students not eligible for transportation, such as out of district students and students who live in a walk zone.

On the first week of school that year, only 802 of the 1,774 students requesting transportation services, scanned their cards and boarded a bus. That means 972 students were included in our planning for rides and stops. When setting up routes and bus stops, we plan for 1,774 students, but hoped not all that number showed up at the bus stops. (If all 1,774 needed a ride we would not have had enough resources to transport all those students to and from school.)
