**Manufacturing in Mechanical Engineering** Patrick Chedmail, J.-C. Bocquet, David Davidson, 2012-12-06 This volume  
contains the selected papers of the first I D M M E conference on Integrated Design and Manufacturing in Mechanical  
Engineering held in Nantes from 15-17 April 1996. Its objective was to discuss the questions related to the definition of the  
optimal design and manufacturing processes and to their integration through coherent methodologies in adapted  
environments. The initiative of the Conference and the organization thereof is mainly due to the efforts of the french  
PRIMECA group. Pool of Computer Resources for Mechanics started eight years ago. We were able to attract the international  
community with the support of the International Institution for Production Engineering Research C I R P. The conference  
brought together two hundred and fifty specialists from around the world. About ninety papers and twenty posters were  
presented covering three main topics: optimization and evaluation of the product design process; optimization and evaluation  
of the manufacturing systems and methodological aspects.      **The Chartered Mechanical Engineer**, 1972      PPI PE

**In Search of Technological Excellence** John

Heywood, 2025-09-04 The notion that Britain was losing its international industrial competitiveness has preoccupied governments since the Second World War. Policymakers have sought to address this over the years and yet Britain's relative industrial decline has appeared to continue raising questions about its root causes. *In Search of Technological Excellence* analyses the policymaking and policy implementation in the education of engineers and technologists from the 1945 report of the Percy Committee on Higher Technological Education to the conclusion of the Thatcher government's Enterprise in Higher Education Initiative. Using a plethora of previously unpublished sources, this book focuses on the untold story of what the reports of the three key committees in this fifty-year period (Percy 1945, Fielden 1963, and Finniston 1980) actually achieved in secondary and higher technological education. The core themes of this volume include industrial training and its assessment, the controversy over the structure of industrial sandwich courses, the perceived requirements for qualified specialists, the manpower controversy, curriculum development, creativity and innovation in engineering, engineers as managers, and engineering in schools. Thought provoking and comprehensive, *In Search of Technological Excellence* reflects on perennial problems to help clarify how this history can inform policymaking today and will be of interest to policymakers, practitioners, and students in engineering education and public administration.
