children in the United States with severe emotional difficulties would have had few options for care The first option was
usually a child guidance clinic within the community but they might also have been placed in a state mental hospital or
asylum an institution for the so called feebleminded or a training school for delinquent children Starting in the 1930s
however more specialized institutions began to open all over the country Staff members at these residential treatment
centers shared a commitment to helping children who could not be managed at home They adopted an integrated approach
to treatment employing talk therapy schooling and other activities in the context of a therapeutic environment Emotionally
Disturbed is the first work to examine not only the history of residential treatment but also the history of seriously mentally
ill children in the United States As residential treatment centers emerged as new spaces with a fresh therapeutic perspective
a new kind of person became visible the emotionally disturbed child Residential treatment centers and the people who
worked there built physical and conceptual structures that identified a population of children who were alike in distinctive
ways Emotional disturbance became a diagnosis a policy problem and a statement about the troubled state of postwar society
But in the late twentieth century Americans went from pouring private and public funds into the care of troubled children to
abandoning them almost completely Charting the decline of residential treatment centers in favor of domestic care based
models in the 1980s and 1990s this history is a must read for those wishing to understand how our current child mental
