# MAIN IDEA

Plants have many different parts. They have roots. The roots grow into the ground and help keep the plant from blowing away. They also suck up water from the soil for the plant. Plants have stems too. The stems have leaves attached to them. The leaves catch sunlight and turn it into food for the plant.

## The main idea is:

- a. Plants use sunlight for food.
- b. The roots of a plant suck up water from the soil.
