Arnetz, Rolf Ekman, 2006-12-13 This book is the first to address the most urgent issues combining a solid basic research approach with applied individual and stress issues including interventions. Throughout the focus is on our latest knowledge about various causes of stress and its neuro cognitive and biological implications. World renowned authors from Europe as well as the US describe how stress affects the brain of young people as well as adults. They cover the topic from all perspectives showing how stress affects life in general from the societal and organizational level to the individual organ and molecular level. While the book clearly points out stress as a risk factor to health, it also offers a number of evidence based methods to cope with stress and even ride the positive energy of stress both as an individual as well as what managers can do to create a healthy and productive workplace. Written in a reader friendly and appealing style, the book provides real life examples from various laboratories as well as such events as the Volvo Ocean Race, the largest around the globe sailing competition. Essential reading for clinicians and biologists as well as for a wide range of students including medicine and public health but also managers and HR staff. In particular mechanisms are described which are basically responsible for the T cell maturation and selection for the

hierarchical organization of the immune system and its thymic dependent immune competence in terms of tolerance and immunity A detailed presentation of the structure and biological properties of a number of well defined thymic hormones is included Their clinical applications and results obtained in inherited or acquired immunodeficiencies and in neoplastic diseases are also reviewed on the grounds of numerous representative clinical trials A perspective and potential scope of immunorestorative therapy and prevention with thymic hormones and other thymomimetic drugs are outlined Researchers practitioners and students will find this book to be a useful and essential source of information
