The Populist Paradox Elisabeth R. Gerber, 2011-11-28 Do small but wealthy interest groups influence referendums ballot initiatives and other forms of direct legislation at the expense of the broader public interest Many observers argue that they do often lamenting that direct legislation has paradoxically been captured by the very same wealthy interests whose power it was designed to curb Elisabeth Gerber however challenges that argument In this first systematic study of how money and interest group power actually affect direct legislation she reveals that big spending does not necessarily mean big influence Gerber bases her findings on extensive surveys of the activities and motivations of interest groups and on close examination of campaign finance records from 168 direct legislation campaigns in eight states Her research confirms what such wealthy interests as the insurance industry trial lawyer associations and tobacco companies have learned by defeats at the ballot box if citizens do not like a proposed new law even an expensive high profile campaign will not make them change their mind She demonstrates however that these economic interest groups have considerable success in using direct legislation to block initiatives that others are proposing and to exert pressure on politicians By contrast citizen interest groups with broad based support and significant organizational resources have proven to be

extremely effective in using direct legislation to pass new laws Clearly written and argued this is a major theoretical and empirical contribution to our understanding of the role of citizens and organized interests in the American legislative process

Boehmke,2005 To demonstrate this the author models the incentives that the initiative process creates for interests to organize and for how they communicate their preferences to policy makers Interests that represent a broader range of the public are found to gain the most from the option to propose initiatives implying that the set of organized interests in initiative states should reflect this advantage Ironically an effect of direct legislation is to potentially increase the effectiveness of special interest lobbying in state legislatures in a sense the opposite of the direct control that gives direct legislation its theoretical appeal Yet the clear effect is one of empowering voices that traditionally had very little effect in the legislative process **Federal Register** ,2003-05-07 Star Schools for All Our Students United States. most issues involved are more easily presented in later chapters this introductory chapter is kept brief

1 MOTIVATION

Substantial political power is often attributed to interest groups Examples abound in both the economics and political science literature as well as in journalistic accounts and popular publications On many occasions the authors express concerns about the negative impact of interest groups on the democratic quality of government The interests of a small group are served at the expense of the interests of the general public the taxpayers is an often heard popular complaint
