Smithner,2025-04-29 This book explores embodied teaching practices through applied and physical theatre drawing
extensively on the author s rich experience teaching in diverse urban environments including schools colleges and prison
settings It presents a groundbreaking conceptualization of embodied practice aimed at fostering personal and social growth
through educational theatre Each chapter delves into theories of social transformation supported by qualitative data from
student reflections to provide both theoretical and practical insights These insights illustrate how physicalized pedagogy can
be effectively used to engage students with socially transformative ideas and identities It also emphasizes the significant role
of the facilitator in this process highlighting how they can create an environment that fosters ethical and multicultural
awareness in both formal educational settings such as classrooms and informal settings like community workshops By
promoting an ethos of inclusivity and ethical consideration it argues that facilitators can help students navigate and engage
with complex social issues through the medium of theatre An accessible and compelling text it aims to inspire educators to
adopt innovative methods that promote deeper engagement and understanding among students The Code of Federal

not spend their time documenting in an electronic medical record Physicians are always complaining about the amount of

time they spend documenting patient care in support of medical billing through an evaluation and management coding system E M New guidelines were created to lessen the time a physician provider spends on documentation as many of the mandatory elements are no longer a requirement for calculating a code level Previously an E M evaluation and management note required documentation of history exam and medical decision making with required elements in each component to support a level for payment If an element was missing the level of service was not supported therefore the code was lowered resulting in a lower reimbursement for the physician provider The new guidelines eliminated the requirement of History and Exam as part of the calculation of a code level Yes an appropriate history and exam are required this supports good patient care but when it comes to reimbursement they are no longer part of the picture The overall system is not difficult if time is taken to understand the elements and how they are applied in the documentation Documentation is a word game always has been the authors focus is to show what words to use to lessen the time but still convey the complexity of the patient s condition and how the physician provider determines a treatment plan which includes the risk to the patient to satisfy the Coding guidelines initiated by Medicare and American Medical Association This book evaluates the new guidelines and brings them into prospective so physicians providers coders can easily understand how to document and calculate the level of service for reimbursement This is not a cumbersome book or complicated but straight to the point The main goal of the book is to educate physicians nurses and coders on what documentation is really required and what has just become habit over the last 30 years
