The Verbum Substantivum from Synchronic. Diachronic and Typological Perspectives Michail L. Kotin, Richard Whitt, 2015-10-13 The verbs of the to be group also called verba substantiva belong to the most enigmatic phenomena of the human language Combining a distinct suppletivity of their conjugational forms in most languages with a striking semantic and functional ambiguity as well as unique syntactic capabilities they form a very specific class of linguistic entities. They can be referred to without exaggeration as one of the conceptually gravest and most symptomatic language formations Typologically the be verbs demonstrate on the one hand a set of similar features in almost every language which is excellent evidence of their universal validity On the other hand the differences between these verbs in various language groups and even in particular languages are remarkable proof of language relativism Historically the be verbs show a sequence of relevant stages in their formal semantic and syntactic developments which in many aspects coincide with their typological and individual idioethnic features and properties One can trace among other things paths and mechanisms of their development and salient changes of their functions in language systems of different types Especially important are also changes in the form and function of the be verbs arising from language contact for they indicate essential tendencies in the evolution of these entities accelerated by the influence of language interaction triggers The contribution of to be verbs to the morphology semantics and syntax of the majority of the languages of the world is substantial from a number of perspectives and these verbs belong to the most complex and simultaneously central entities of human language For this reason their analysis must continually be synchronized with the newest results of general linguistic research This volume hence describes and interprets the to be verbs and constructions in the broad context of contemporary linguistic research including synchrony diachrony diatopy language contrast and typology Private Diary of Travels, Personal Services, and Public Events Sir Robert Wilson, 1861 Foucault and the Human

Subject of Science Garðar Árnason, 2018-10-29 This book offers a clear analysis of Foucault's work on scientific knowledge and its relationship to individuals and society It suggests a way of using Foucault's tools for science criticism and resistance while avoiding the pitfalls of vulgar relativism or irrational anti science views Two cases of scientific conflict are considered The first considers left handers as subjects of science in particular studies which purport to show that left handers die on average younger than right handers. The second case considers Icelanders as subjects of science in the context of a partly failed attempt to construct a genetic database encompassing the entire nation The book will be of interest to bioethicists and philosophers who are concerned with the interaction between science and its human subjects as well as scholars concerned with Foucault's work on science Private Diary of Travels, Personal Services, and Public Events During Mission ... in the Campaigns of 1812, 1813, 1814 Wilson, 1861 The Cultural Revolution in the Foreign Ministry of China Ma Jisen, 2020-06-15 The Cultural Revolution which occurred between 1966 and 1976 was a major unforgettable event in modern Chinese history For more than thirty years the prevalent view of the Cultural Revolution in the Chinese Foreign Ministry has been that the rebels controlled the Foreign Ministry in August 1967 and caused the many excesses in foreign affairs such as the burning of the British mission in Beijing which isolated China from the rest of the world The author of this book challenges this point of view The book gives a factual account of the course of the ten year Cultural Revolution in the Foreign Ministry based on documents issued during the Cultural Revolution talks by Zhou Enlai and Chen Yi and the manuscripts of the people concerned as well as interviews with Foreign Ministry staff members who personally took part in the events

Thiselton, 2006 Hermeneutics is an interdisciplinary study of how we interpret texts especially biblical texts in the light of theories of understanding in philosophy meaning in literary theory and of theology This volume brings together the seminal thought of a leading contemporary pioneer in this field Thiselton's The Two Horizons was a classic on how horizons of biblical texts engage creatively with the horizons of the modern world The author's later New Horizons in Hermeneutics explored still more deeply the transforming capacities of biblical texts while his massive commentary on 1 Corinthians interpreted an epistle This volume collects many of Anthony Thiselton's more notable writings from some seven books and 70 articles to which he adds his own re appraisals of earlier work It uniquely expounds the thought of a major contemporary British theologian through his own words and includes his own critical assessments
