Launching Space Objects: Issues of Liability and Future Prospects V. Kayser,2006-04-11 Launch activities performed by private entities deal with a complex legal environment The Space Treaties provide a general liability framework Launch participants are subject to regulatory or institutional control and to domestic liability laws Specific contractual practice has developed due to insurance limitations the inter participants waivers of liability and claims This book synthesizes information on the norms of play to allow the grasp of their relative weight and interactions in the assessment of liability risk for launch activities It reveals a legal framework presently lacking sufficient predictability for an efficient liability risk management the waivers of liability suffer weaknesses as do all such clauses and lack uniformity and reliability and the Space Treaties contain ambiguous terms preventing predictable determination of the States responsible for authorizing and supervising launch activities and for damage compensation and do not reflect the liability of launch operators This book offers suggestions of new approaches for harmonizing waivers of liability to improve their consistency validity and flow down and improving the Space Treaties for their implementation to non governmental launch activities In the launch community the need for lawmaking is less compelling than in fields such as aviation Nevertheless adjustments to the present framework are proposed through model clauses and an international instrument for further thinking and contribution by those sharing the opinion that creative lawmaking is needed now to prepare for tomorrow s endeavors
