Water Chemistry Stanley E. Manahan, 2010-08-19 Carefully crafted to provide a comprehensive overview of the chemistry of water in the environment Water Chemistry Green Science and Technology of Nature s Most Renewable Resource examines water issues within the broad framework of sustainability an issue of increasing importance as the demands of Earth s human population threaten to overwhelm the planet s carrying capacity Renowned environmental author Stanley Manahan provides more than just basic coverage of the chemistry of water He relates the science and technology of this amazing substance to areas essential to sustainability science including environmental and green chemistry industrial ecology and green sustainable science and technology The inclusion of a separate chapter that comprehensively covers energy including renewable and emerging sources sets this book a part Manahan explains how the hydrosphere relates to the geosphere atmosphere biosphere and anthrosphere His approach views Planet Earth as consisting of these five mutually interacting spheres He covers biogeochemical cycles and the essential role of water in these basic cycles of materials He also defines environmental chemistry and green chemistry emphasizing water s role in the practice of each Manahan highlights the role of the anthrosphere that part of the environment constructed and operated by humans He underscores its overwhelming influence on the environment and its pervasive effects on the hydrosphere He also covers the essential role that water plays in the sustainable operation of the anthrosphere and how it can be maintained in a manner that will enable it to operate in harmony with the environment for generations to come Written at an intermediate level this is an appropriate text for the study of current affairs in environmental chemistry It provides a review and grounding in basic and organic chemistry for those students who need it and also fills a niche for an aquatic chemistry book that relates the hydrosphere to the four other environmental spheres

Waking the Power Within Thermodynamics and the Human Battery Professor ibrahim elnoshokaty , The sci fi film The Matrix introduces a fascinating premise where humans function as energy sources for an advanced machine society In this fictional world human bodies are maintained in a state of suspended animation while their minds exist in a virtual reality allowing machines to extract their bioelectric thermal and kinetic energy This article investigates the scientific feasibility of utilizing humans as a power source by applying thermodynamic principles According to the first law of thermodynamics the energy required to sustain human life would result in a net energy loss for the machines The second law indicates that the system s entropy would rise rendering it an inefficient energy strategy Furthermore the energy output of a human body even if fully utilized would be inadequate to meet the machines energy demands More efficient alternatives for the machines would include other biological power sources and energy harvesting techniques such as solar or nuclear power The article concludes that while

the concept of human batteries serves as an engaging storytelling element it is not a scientifically viable solution for the machines energy requirements The machines choice to preserve human life may be motivated by other factors such as leveraging their collective cognitive abilities for computational purposes or adhering to an ethical code that prohibits the complete annihilation of humanity This investigation aims to fill the gap by providing a detailed thermodynamic analysis of the energy expenditure required to sustain human life in a suspended animation state and the inefficiency of this system as an energy source for machines a facet previously unexplored By elucidating the thermodynamic constraints of human based energy sources this study not only challenges a popular sci fi narrative but also enriches our understanding of bioenergetic processes and their implications for future energy harvesting technologies **Labs on Chip** Eugenio Iannone,2018-09-03
