Books in Print Supplement ,2002 Reviews of Environmental Contamination and Toxicology George W.
 Ware,Herbert N. Niggs,Arthur Bevenue,2012-12-06 International concern in scientific industrial and governmental
 communities over traces of xenobiotics in foods and in both abiotic and biotic environments has justified the present
 triumvirate of specialized publications in this field comprehensive reviews rapidly published research papers and progress
 reports and archival documentations These three international publications are integrated and scheduled to provide the
 coherency essential for nonduplicative and current progress in a field as dynamic and complex as environmental
 contamination and toxicology This series is reserved exclusively for the diversified literature on toxic chemicals in our food
 our feeds our homes recreational and working surroundings our domestic animals our wildlife and ourselves Tremendous
 efforts worldwide have been mobilized to evaluate the nature presence magnitude fate and toxicology of the chemicals
 loosed upon the earth Among the sequelae of this broad new emphasis is an undeniable need for an articulated set of
 authoritative publications where one can find the latest important world literature produced by these emerging areas of
 science together with documentation of pertinent ancillary legislation Research directors and legislative or administrative
 advisers do not have the time to scan the escalating number of technical publications that may contain articles important to
 current responsibility Rather these individuals need the background provided by detailed reviews and the assurance that the
 latest information is made available to them all with minimal literature searching *American Book Publishing Record*
