

RESEARCH PROPOSAL TEMPLATE

When preparing an application for entry into a research higher degree program it is necessary to supply a clear statement describing the proposed area of research (a research proposal). Consultation with a faculty or school academic staff member in the research area of interest is recommended prior to submission of an application. Liaising with an academic allows you to frame the proposal to align with established disciplines and areas of supervisor capacity.

You must write your own research proposal and reference accordingly. The exception is when your potential supervisor finalises the research proposal with you, for a specific research project that has already been defined. Please visit the University's Academic Integrity pages and policy

Graduate research is a complicated process which many engineering and science students aspire to undertake The complexity of the process can lead to failures for even the most brilliant students Success with graduate level research requires not only a high level of intellectual ability but also a high level of program management skills After many years of supervising several graduate students I have found that most of them have the same basic problems of planning and implementing their research programs Even the advanced graduate students need the same mentoring and management guidance that has little to do with actual classroom performance It is my conjecture that graduate students could make a better job of their research programs if a self paced guide were available to them The guide provided in this book covers topics ranging from how to select an appropriate research problem to how to schedule and execute research tasks The book takes a project management approach to planning and implementing graduate research in engineering science and manufacturing disciplines It is a self paced guide that will help graduate students and advisors answer most of the basic questions about how to do this and how to do that There is a need for such a guide book The book will alleviate frustration on the part of the student and the research advisor
