SAMPLE

As an avid lover of animals, Tracy Jones has dreamed of becoming a veterinarian since she was four years old. Her love of animals started at a young age, having grown up in a family which also consisted of two dogs, one cat, and two hamsters. When she was seven years old, her dog became diagnosed with cancer, and she nursed it for an entire year in order to minimize pain and prepare for rounds of chemotherapy. After her dog passed away, she became determined to become a doctor that would be able to treat animals and ensure their comfort.

Tracy attended Lady Jones High School, where she graduated with a GPA of 3.97. During her time in high school, she was active in many animal rights and advocacy groups, and was president of the Paws of Awareness club, where she led group efforts to find shelter for abandoned pets. Additionally, she took courses at her local community college which allowed her to get a head start on her college work. She is currently a sophomore at Trinity College, where she is currently in pre-veterinary studies. She currently has a GPA of 3.88, and volunteers twice a week at a local animal shelter providing basic healthcare and examinations for the animals housed there.

Tracy has an extensive volunteering list which has given her significant animal handling abilities and the skills needed to identify and treat basic diseases commonly seen in pets. She has volunteered at a feline shelter, helping to clean and feed animals, as well as providing basic care until the veterinarian could give the animals a thorough exam. She is also an advocacy blogger, who writes about her experiences online in order to teach people how to better take care of their pets and identify warning signs of disease that could possibly save the animal's life.

Political Psychology of Turkish Political Behavior Cengiz Erisen, 2016-04-14 The primary motivation for this book is to focus on something crucial that is missing in Turkish political science well founded theories on the Turkish voter and empiricism in scholarly research Given the absence of such theories

one could ask what then the best model is for explaining a Turkish citizen's vote choice and political behaviour and what schools of thought Turkish political science has. Unfortunately it is not possible to offer a satisfactory response to either question at this point and among the clear deficiencies in the current literature the primary one is the lack of a robust model explaining how Turkish citizens form their political attitudes, engage in political participation or cast their votes. With these important questions in mind, this book aims to generate an interest in the theoretical and methodological tools that one can employ to conduct research contributing to the needs of the literature, particularly in political behaviour and political psychology. This book expands our understanding about the processes and the mechanisms of Turkish political behaviour and contributes to the foundations of theory building in the literature. This book was published as a special issue of *Turkish Studies*.
