(Patient Address)

Dear Patients

It has been my pleasure to serve our community for the past 47 years as a family physician. I have had the privilege of meeting a great many people and developing lifelong friendships with many patients. But now it is time for me to retire and pass along my patients to the other competent physicians at Highland Medical.

Please know that all of your medical records are safely on file here at Highland Medical and remain confidential as per federal law. If you decide to take on a new physician outside of our practice then you can follow the traditional routes to have your records transferred.

Over the past five decades I have watched many families in the area grow and have shared heartache and joy with hundreds of patients. I appreciate your loyalty throughout the years and will take the memories of all that I have experienced with me into my retirement. But medicine is a young man's game and I need to take my final ride into the sunset.

If you have any questions you can contact Diane Notion here at the practice. Diane is chief of records. Her phone number is 555-433-0422. My retirement is effective on September 15 2014. If I do not have an appointment to see you then I wish you health and happiness.

Sincerely Yours

Dr. Allan J. Halter

2307 08619 telecom networking with a diamond quantum - Feb 26 2022

web jul 17 2023 we further demonstrate the utility of this system for quantum networking by converting telecom band time bin pulses sent across a lossy and noisy 50 km deployed fiber link to the visible band and mapping their quantum states onto a diamond quantum memory with fidelity mathcal f 87 pm 2 5 these results demonstrate the viability

quantum key distribution in a packet switched network - Jan 08 2023

web sep 9 2023 abstract packet switching revolutionized the internet by allowing the efficient use of network resources for data transmission in a previous work we introduced packet switching in quantum

quantum technology for 5g 6g wireless communication - Mar 10 2023

web feb 15 2022 this special issue presents and theoretical and fundamental research on the potential and limitations of quantum technology and explores how to achieve secure communication for wireless networks in the presence of quantum technologies

quantum communications and networks nist - Jul 14 2023

web feb 7 2023 the quantum communication and networks project develops quantum devices and studies them for use in quantum communications and networking applications our goal is to bridge the gap between fundamental quantum mechanics information theory and their practical applications in information technology

multiplexed telecommunication band quantum networking with - Apr 11 2023

web operation and large scale quantum information processing is an outstanding challenge that has limited the potential of elementary quantum networks we propose a platform for interfacing quantum processors comprising neutral atom arrays with telecommunication band photons in a multiplexed network architecture the use of

multiplexed telecommunication band quantum networking with - Sep 04 2022

web dec 3 2021 abstract the realization of a quantum network node of matter based qubits compatible with telecommunication band operation and large scale quantum information processing is an outstanding challenge that has
