

The Sunshine Act Reporting Process

Who will report payments?	<p>All drug, biologic, and medical device manufacturers that manufacture one or more products that are covered under Medicare, Medicaid, or the Children's Health Insurance Program</p> <p>Group-purchasing organizations (GPOs) and physician-owned distributors of medical devices</p>
What kind of providers will be reported on?	<p>All licensed physicians, including doctors of medicine or osteopathy, dentists, podiatrists, optometrists, and chiropractors</p> <p>Teaching hospitals (such as any hospital that receives direct or indirect graduate medical education funding from Medicare)</p>
What must be reported?	<p>General payments—cash and cash equivalents, in-kind items or services, consulting and speaker fees, gifts, honoraria, travel and entertainment expenses, meals, education, charitable contributions, and grants</p> <p>Ownership or investment interests by physicians and their immediate family members, including stocks, royalties, and licenses</p> <p>Research payments, including clinical investigations that are subject to both a written agreement between the manufacturer and the recipient and a research protocol</p>
What does not need to be reported?	<p>Any payment of less than \$10, unless those payments total \$100 over the course of a year</p> <p>Product samples, discounts and rebates, in-kind items for charity care, educational materials intended for patients, devices loaned for the purpose of clinical trials, warranty services, and shares in publicly traded mutual funds</p>
What is the timeline for reporting?	<p>August 1, 2013–December 31, 2013: First reporting period</p> <p>March 31, 2014: Submission deadline for data from the first reporting period</p> <p>September 30, 2014: Centers for Medicare and Medicaid Services released data from the first reporting period</p>
What are the consequences for failure to report?	<p>Manufacturers and GPOs may be fined \$1,000–\$10,000 per unreported payment, up to an annual maximum of \$150,000.</p> <p>For deliberately failing to report, manufacturers and GPOs can be fined \$10,000–\$100,000 per payment, up to a maximum penalty of \$1 million.</p>

Selling Healthcare Gary Polsky, Andrea Rowland, 2013-06-12 800x600 Build the Healthcare Sales Relationships That Power Enduring Success Healthcare salespeople have immense opportunities But enduring success demands more than training and great products You need High Return Relationships pre qualified connections elevated by genuine shared passions and a long term outlook Selling Healthcare will help you build those relationships It leverages decades of experience in healthcare sales and management and it s packed with insights from healthcare sales pros in pharmaceuticals medical devices hospice home health and beyond Whether you sell to hospital executives doctors office staffs nursing home directors or anyone in healthcare these techniques work They create genuine loyalty real trust and phenomenal growth Leverage these core traits Laser focus A sense of urgency An agendaless presence Excellence in communication and research Master these 5 strategies 1 Project a magnetic presence that inspires interpersonal connections 2 Light the spark of rapport to stimulate the heartbeat of the High Return Relationship 3 Listen to understand by putting your selfish agenda aside 4 Show appreciation admiration and respect to connect with your customer s heart and head 5 Create Relationship Development plans that script the unfolding of your High Return Relationships Federal Register ,2013-03 **Critical Psychiatry** Sandra Steingard, 2018-12-24 This book is a guide for psychiatrists struggling to incorporate transformational strategies into their clinical work The book begins with an overview of the concept of critical psychiatry before focusing its analytic lens on the DSM diagnostic system the influence of the pharmaceutical industry the crucial distinction between drug centered and disease centered approaches to pharmacotherapy the concept of de prescribing coercion in psychiatric practice and a range of other issues that constitute the targets of contemporary critiques of psychiatric theory and practice Written by experts in each topic this is the first book to explicate what has come to be called critical psychiatry from an unbiased and clinically relevant perspective Critical Psychiatry is an excellent practical resource for clinicians seeking a solid foundation in the contemporary controversies within the field General and forensic psychiatrists family physicians internists and pediatricians who treat psychiatric patients and mental health clinicians outside of medicine will all benefit from its conceptual insights and concrete advice Conflict of Interest and Medical Innovation Institute of Medicine, Board on Health Sciences Policy, Roundtable on Translating Genomic-Based Research for Health, 2014-06-16 Scientific advances such as the sequencing of the human genome have created great promise for improving human health by providing a greater understanding of disease biology and enabling the development of new drugs diagnostics and preventive services However the translation of research advances into clinical applications has so far been slower than anticipated This is due in part to the complexity of the underlying biology as well as the cost and time it takes to develop a product Pharmaceutical companies are adapting their business models to this new reality for product development by placing increasing emphasis on leveraging alliances joint development efforts early phase research partnerships and public private partnerships These collaborative

efforts make it possible to identify new drug targets enhance the understanding of the underlying basis of disease discover novel indications for the use of already approved products and develop biomarkers for disease outcomes or directed drug use While the potential benefits of collaboration are significant the fact that the relationships among development partners are often financial means that it is vital to ensure trust by identifying disclosing and managing any potential sources of conflict that could create bias in the research being performed together Conflict of Interest and Medical Innovation is the summary of a workshop convened by the Institute of Medicine Roundtable on Translating Genomic Based Research for Health in June 2013 to explore the appropriate balance between identifying and managing conflicts of interest and advancing medical innovation A wide range of stakeholders including government officials pharmaceutical company representatives academic administrators and researchers health care providers medical ethicists patient advocates and consumers were invited to present their perspectives and participate in discussions during the workshop This report focuses on current conflict of interest policies and their effect on medical innovation in an effort to identify best practices and potential solutions for facilitating innovation while still ensuring scientific integrity and public trust **Let the Sunshine in** United States.

China's Supreme Court Ronald C. Keith,Zhiqiu Lin,Shumei Hou,2013-10-23 This book examines the learning curve of the People s Supreme Court of China as an expanding Chinese national institution that has played a key role in the struggle for the rule of law in China Within the unity of state administration and the requirements of the constitution the court has negotiated the changing tension between politics and law through improvising new formats of interpretation and supervision in response to the changing priorities of revolution and market reform

Regulation and Genetics H. Fraenkel-Conrat,2013-04-17 The time seems ripe for a critical compendium of that segment of the biological universe we call viruses Virology as a science having passed only recently through its descriptive phase of naming and numbering has probably reached that stage at which relatively few new truly new viruses will be discovered Triggered by the intellectual probes and techniques of molecular biology genetics biochemical cytology and high resolution microscopy and spectroscopy the field has experienced a genuine information explosion Few serious attempts have been made to chronicle these events This comprehensive series which will comprise some 6000 pages in a total of about 22 volumes represents a commitment by a large group of active investigators to analyze digest and expostulate on the great mass of data relating to viruses much of which is now amorphous and disjointed and scattered throughout a wide literature In this way we hope to place the entire field in perspective and to develop an invaluable reference and sourcebook for researchers and students at all levels This series is designed as a continuum that can be entered anywhere but which also provides a logical progression of developing facts and integrated concepts
