Risk Analysis in Finance and Insurance, Second Edition Alexander Melnikov, 2011-04-25 Risk Analysis in Finance and Insurance Second Edition presents an accessible yet comprehensive introduction to the main concepts and methods that transform risk management into a quantitative science. Taking into account the interdisciplinary nature of risk analysis, the author discusses many important ideas from mathematics, finance, and actuarial science in a simplified manner. He explores the interconnections among these disciplines and encourages readers toward further study of the subject. This edition continues to study risks associated with financial and insurance contracts using an approach that estimates the value of future payments based on current financial insurance and other information. New to the Second Edition: Expanded section on the foundations of probability and stochastic analysis. Coverage of new topics including financial markets with stochastic volatility, risk measures, risk-adjusted performance measures, and equity-linked insurance. More worked examples and problems. Reorganized and expanded this updated book illustrates how to use quantitative methods of stochastic analysis in modern financial mathematics. These methods can be naturally extended and applied in actuarial science, thus leading to unified methods of risk analysis and management.

Writing That Makes Sense, 2nd Edition David S. Hogsette, 2019-11-05 The second edition of Writing That Makes Sense takes students through the fundamentals of the writing process and explores the basic steps of critical thinking. Drawing upon over twenty years of experience teaching college composition and professional writing, David S. Hogsette combines relevant writing pedagogy and practical assignments with the basics of critical thinking to provide students with step-by-step guides for successful academic writing in a variety of rhetorical modes. New in the second edition: Expanded discussion of how to write effective thesis statements for informative, persuasive, evaluative, and synthesis essays, including helpful thesis statement templates. Extensive templates introducing students to conventions of academic discourse, including integrating outside sources, interacting with other writers' ideas, and dialoguing with multiple perspectives. Examples of academic writing from different disciplines illustrating essay titles, abstracts, thesis statements, introductions, conclusions, and voice. Expanded discussion of voice in academic writing, including an exploration of active and passive voice constructions in different disciplines and tips on how to edit for clarity. A new chapter on writing in the disciplines. Updated sample student papers. New readings with examples of opposing views and multiple perspectives.
