Cangelosi, 1992 *Toward Effective Instruction in Secondary Social Studies* Lee Ehman, 1982-12-07 *John Buridan* Gyula Klima, 2009 John Buridan ca 1300 1362 has worked out perhaps the most comprehensive account of nominalism in the history of Western thought the philosophical doctrine according to which the only universals in reality are names the common terms of our language and the common concepts of our minds But these items are universal only in their signification they are singular entities like any other in reality This book examines what is most intriguing to contemporary readers in Buridan s medieval philosophical system his nominalist account of the relationship between language thought and reality The main focus of the discussion is Buridan s deployment of the Ockhamist conception of a mental language for mapping the complex structures of written and spoken human languages onto a parsimoniously construed reality Concerning these linguistic structures this book carefully analyzes Buridan s conception of the radical conventionality of written and spoken languages in contrast to the natural semantic features of concepts The discussion pays special attention to Buridan s token based semantics of terms and propositions his conception of existential import ontological commitment truth and logical validity Finally the book presents a detailed discussion of how these logical devices allow Buridan to maintain his nominalist position without giving up Aristotelian essentialism or yielding to skepticism and pays special attention to contemporary concerns

with these issues **The Trinity** Saint Augustine (of Hippo),1990 A splendid translation made from a trustworthy Latin text of what is for some of us the foundation work of Christian theology He has fitted out his translation clearly the best of the four that have been made into English with notes that go well beyond the perfunctory and a 38 page introduction that is a delight to read Journal of Religion and Health Barry Ulanov *The Works of Saint Augustine: v. 1.
