A Secret History of Consciousness Gary Lachman, 2003-07 For the last four centuries science has tried to account for everything in terms of atoms and molecules and the physical laws they adhere to Recently this effort was extended to try to include the inner world of human beings Gary Lachman argues that this view of consciousness is misguided and unfounded He points to another approach to the study and exploration of consciousness that erupted into public awareness in the late 1800s In this secret history of consciousness consciousness is seen not as a result of neurons and molecules but as responsible for them meaning is not imported from the outer world but rather creates it In this view consciousness is a living evolving presence whose development can be traced through different historical periods and which evolves along a path to a broader more expansive state What that consciousness may be like and how it may be achieved is a major concern of this book Lachman concentrates on the period since the late 1800s when Madame Blavatsky first brought the secret history out into the open As this history unfolds we encounter the ideas of many modern thinkers from esotericists like P D Ouspensky Rudolf Steiner and Colin Wilson to more mainstream philosophers like Henri Bergson William James Owen Barfield and the psychologist Andreas Mavromatis Two little known but important thinkers play a major role in his synthesis Jurij Moskvitin who showed how our consciousness relates to the mechanisms of perception and to the external world and Jean Gebser who presented perhaps the most impressive case for the evolution of consciousness An important contribution to the study of consciousness a must read

2 The universe that this book describes is different because it was made with humankind in mind It was created by God but he allowed his reflections humans to develop and grow over time

3 The universe is anthropocentric It has nurtured us through the centuries cradled us and helped the unique thing that is human consciousness to evolve When you cry out the universe turns towards you in sympathy

4 In the universe of the secret societies a coin flipped in strict laboratory conditions will still land heads up in 50 percent of cases but these laws only apply when all human subjectivity has been deliberately excluded In the normal run of things when human happiness and hopes for self fulfillment depend on the outcome of the roll of the dice the laws of probability are bent
