

Section 16-2 "Disruption of Genetic Equilibrium"

■ 3. Genetic Drift

- Genetic equilibrium requires the presence of a large population.
- Genetic drift is only significant in small and medium-sized populations.
- Genetic drift – allele frequencies in a population change as a result of random events, or chance (Figure 16-6, pg 305).

■ 4. Nonrandom Mating

- Genetic equilibrium requires random mating, regardless of genetic makeup.
- Assortative mating - selection of a mate based on similar characteristics.
- Nonrandom mating can affect genotypes, but it does not affect overall allele frequencies.

Solving Problems in Genetics Richard Kowles, 2013-12-01 The principle objective of this book is to help undergraduate students in the analysis of genetic problems Many students have a great deal of difficulty doing genetic analysis and the book will be useful regardless of which genetics text is being used Most texts provide some kinds of problems and answers few if any however show the students how to actually solve the problem Often the student has no idea how the answer was derived This work emphasizes solutions not just answers The strategy is to provide the student with the essential steps and the reasoning involved in conducting the analysis Throughout the book an attempt is made to present a balanced account of genetics Topics therefore center about Mendelian cytogenetic molecular quantitative and population genetics with a few more specialized areas Whenever possible the student is provided with the appropriate basic statistics necessary to make some of the analyses The book also builds on itself that is analytical methods learned in early parts of the book are subsequently revisited and used for later analyses A deliberate attempt is made to make complex concepts simple and sometimes to point out that apparently simple concepts are sometimes less so on further investigation Any student taking a genetics course will find this book an invaluable aid to achieving a good understanding of genetic principles and practice
