

# Europe Faces Revolutions

## MAIN IDEA

**REVOLUTION** Liberal and nationalist uprisings challenged the old conservative order of Europe.

## WHY IT MATTERS NOW

The system of nation-states established in Europe during this period continues today.

## TERMS & NAMES

- conservative
- liberal
- radical
- nationalism
- nation-state
- the Balkans
- Louis-Napoleon
- Alexander II

**SETTING THE STAGE** As revolutions shook the colonies in Latin America, Europe was also undergoing dramatic changes. Under the leadership of Prince Metternich of Austria, the Congress of Vienna had tried to restore the old monarchies and territorial divisions that had existed before the French Revolution. (See Chapter 23.) On an international level, this attempt to turn back history succeeded. For the next century, European countries seldom turned to war to solve their differences. Within countries, however, the effort failed. Revolutions erupted across Europe between 1815 and 1848.

## Clash of Philosophies

In the first half of the 1800s, three schools of political thought struggled for supremacy in European societies. Each believed that its style of government would best serve the people. Each attracted a different set of followers. The list below identifies the philosophies, goals, and followers.

- **Conservative:** usually wealthy property owners and nobility. They argued for protecting the traditional monarchies of Europe.
- **Liberal:** mostly middle-class business leaders and merchants. They wanted to give more power to elected parliaments, but only the educated and the landowners would vote.
- **Radical:** favored drastic change to extend democracy to all people. They believed that governments should practice the ideals of the French Revolution—liberty, equality, and brotherhood.

## Nationalism Develops

As conservatives, liberals, and radicals debated issues of government, a new movement called nationalism emerged. **Nationalism** is the belief that people's greatest loyalty should not be to a king or an empire but to a nation of people who share a common culture and history. The nationalist movement would blur the lines that separated the three political theories.

When a nation had its own independent government, it became a **nation-state**. A nation-state defends the nation's territory and way of life, and it represents the nation to the rest of the world. In Europe in 1815, only

▼ Prince Clemens von Metternich shaped conservative control of Europe for almost 40 years.

## TAKING NOTES

Weidenbaum, 1988 The juxtaposition of Kennedy and Reagan approaches to economic problems is particularly instructive in that they express the two major and quite different approaches of macroeconomic policy in the past three decades the 1962 Kennedy Camelot which relied on traditional Keynesian economics and the 1982 Reagan program which called for a supplyside solution to the country s economic difficulties From today s vantage point it is useful to compare what these two different groups of economic advisors planned to do what they did and what the results were James Tobin who received the Nobel Prize in economics in 1981 is Sterling Professor of Economics at Yale His Essays in Economics collected in three volumes are available from The MIT Press Murray L.
