

Reading Comprehension

Task 1 How Singing Began

We know that people learned to write long, long ago. For more than 7,000 years people have been writing down their thoughts. But even before people learned to write they could sing! Music began even before writing.

The people of old times drew themselves on rocks. Some of the pictures that preserved show dancers and singers, and also people playing some musical instruments. So our earliest ancestors were fond of music.

How did people learn to sing? What musical instruments did they play? Archaeologists and musicologists give the answer to these questions.

Our ancestors lived in groups because only together they could get their food and defend themselves from wild animals. They learned to make tools and work together.

The group of early men worked together like an orchestra and they usually murmured to each movement of their hand or foot. Without the murmuring (or "singing") they could not do the work.

Later people learned to make other and better tools and it was not necessary to sing during their work. But singing began, and there are songs in many countries which are probably children of these first work songs.

When man made his earliest tools, he learned to make musical instruments, too. Those pictures on rocks show people playing musical instruments. A very careful analysis of the bones of animals that archaeologists found in a number of ice-age camps show that the men of that time could use them for making sounds. So bones of animals, horns, pieces of wood were man's first musical instruments. By blowing into horns or bones people could make a very loud sound. They could also make sounds by beating one piece of wood against another or a piece of wood against a stone. People of that time could also use strings and fur to make musical instruments. That was the time when people did not have metal. And yet they could sing and were fond of music.

Read the text and choose the correct item to complete the sentence.

1. For more than 7,000 years people have been writing down their ...

A. music B. Stories C. Thoughts D. Letters

2. Some preserved pictures on the rocks show ...

A. dancers and singers B. ancient actors C. teachers and pupils
D. fighting men

3. People could sing before they learned ...

Year 8 Comprehension Exercise

Mohammad Al-Masri

Year 8 Comprehension Exercise:

Teaching Reading in the Secondary Schools Geoff Dean, 2013-02-01 Being able to read well is one of the most important literacy requirements in our society. It is fundamental to almost all secondary school subjects and the English programme in particular. The new Key Stage 3 focus on teaching reading compels us to find exciting ways to engage young people with texts that they will continue with and develop themselves. This book outlines several approaches to reading which challenge former classroom practices. It is through these approaches that all students from reluctant boys to the most able of either gender can continue to grow as readers and develop their readiness to seek meaning in texts. This second edition adds to the original ideas in Geoff Dean's first book and includes new methods of teaching reading including guided reading and using increased grammatical student knowledge.

Teaching Reading in Secondary Schools Geoff Dean, 2003 First Published in 2006 Routledge is an imprint of Taylor Francis, an informal company.

Assessment Prep for Common Core Reading, Grade 7 Schyrlet Cameron, Suzanne Myers, 2015-01-05 Assessment Prep for Common Core Reading is designed to help students acquire the skills and practice the strategies needed to successfully perform on CCSS assessments. Marchenkova, 2004-12-13 This volume is the first to explore

links between the Russian linguist Mikhail Bakhtin's theoretical insights about language and practical concerns with second and foreign language learning and teaching. Situated within a strong conceptual framework and drawing from a rich empirical base, it reflects recent scholarship in applied linguistics that has begun to move away from formalist views of language as universal autonomous linguistic systems and toward an understanding of language as dynamic collections of cultural resources. According to Bakhtin, the study of language is concerned with the dialogue existing between linguistic elements and the uses to which they are put in response to the conditions of the moment. Such a view of language has significant implications for current understandings of second and foreign language learning. The contributors draw on some of Bakhtin's more significant concepts such as dialogue, utterance, heteroglossia, voice, and addressivity to examine real-world contexts of language learning. The chapters address a range of contexts including elementary and university level English as a second language and foreign language classrooms and adult learning situations outside the formal classroom. The text is arranged in two parts. Part I, Contexts of Language Learning and Teaching, contains seven chapters that report on investigations into specific contexts of language learning and teaching. The chapters in Part II, Implications for Theory and Practice, present broader discussions on second and foreign language learning using Bakhtin's ideas as a springboard for thinking. This is a groundbreaking volume for scholars in applied linguistics, language education, and language studies with an interest in second and foreign language learning for teacher educators and for teachers of languages from elementary to university levels. It is highly relevant as a text for graduate level courses in applied linguistics and second and foreign language education.

U.S. Constitution Puzzles, Grades 5 - 12 Jeanne Cheyney, Arnold Cheyney, 2023-02-13 Help your 5th grader, middle school, or high school child build proficiency in US history with the activity-packed Mark Twain US Constitution Puzzles Activity Book.
