What Teachers Need to Know about Numeracy Peter S. Westwood, Peter Westwood, 2008 There is an increasing need for numeracy skills in all aspects of life. This book explores the issues that are emerging regarding the teaching of these skills beginning with preschool and the early years of primary school through to adults with poor numeracy skills. It draws on research and relevant literature from several different countries to provide a comprehensive overview of the subject and contains many links to other sources of information and additional resources.

What Teachers Need to Know About Assessment and Reporting Phil Ridden, Sandy Heldsinger, 2014-05-01 What Teachers Need to Know About Assessment and Reporting is a response to the pressures on teachers and schools to not only improve the quality of teaching but to demonstrate improved outcomes. Many teachers apply assessment approaches which are familiar from their own education or that are learnt from peers. This book seeks to fill the gap in teacher knowledge about assessment and reporting and to provide practical support in this area for teachers and school leaders. It explores the various purposes of assessment along with practical guidance on creating and scoring assessments, interpreting and using data and reporting the results to various audiences for various purposes.

Valuing Students with Impairment J. Joy Cumming, 2012-01-05 In this book the author Joy Cumming draws on knowledge of law, assessment and measurement to provide an original analysis of the inclusion of students with impairment in educational accountability assessments in the U.S., England and Australia. Equitable education of students with impairment is worldwide policy. Educational accountability for improvement of educational outcomes is also a worldwide phenomenon. The U.S., England and Australia are well placed economically and politically to pursue best educational practice for students with impairment and well advanced in both provision and educational accountability systems. Examining these three systems enables an analysis of possible optimal practices to guide other countries. The book identifies three models of impairment in place in legislation, policy and enacted practice for educational accountability with students with impairment. Intentions of legislation and policy reflect a social model of impairment while an individual has an impairment, social practice creates the barrier that leads to a disability. In implementation, legislation and policy rely on a medical model of disability, categorizing disability in medical or

specialist terms In educational accountability practices it is argued in this book a third model of disability is created a psychometric model with impairment constructed through overemphasis on standardization of assessment processes Eight explicit and implicit assumptions that underpin the ways students with impairment are valued in educational accountability are identified and discussed Three recommendations are made to promote equitable inclusive educational accountability practices for students with impairment to inform future policy and practice in all countries OECD Reviews of Evaluation and Assessment in Education Synergies for Better Learning An International Perspective on Evaluation and Assessment
