The Digital Humanities Christopher Millson-Martula, Kevin B. Gunn, 2020-06-29 The digital humanities in academic institutions and libraries in particular have exploded in recent years Librarians are constantly developing their management and technological skills and increasing their knowledge base As they continue to embed themselves in the scholarly conversations on campus the challenges facing subject liaison librarians technical service librarians and library administrators are many This comprehensive volume highlights the wide variety of theoretical issues discussed initiatives pursued and projects implemented by academic librarians Many of the chapters deal with digital humanities pedagogy planning and conducting training workshops institutes semester long courses embedded librarian instruction and instructional assessment with some chapters focusing specifically on applications of the ACRL Framework for Information Literacy for Higher Education The authors also explore a wide variety of other topics including the emotional labor of librarians the challenges of transforming static traditional collections into dynamic user centered digital projects conceptualizing and creating models of collaboration digital publishing and developing and planning projects including improving one's own project management skills This collection effectively illustrates how librarians are enabling themselves through active research partnerships in an ever changing scholarly environment This book was originally published as a

special triple issue of the journal *College Undergraduate Libraries* **Between Femininities** Marnina Gonick, 2012-02-01
 Arguing for a recognition of the contradictory and ambivalent identifications that both attract and repel those who live the social category girl Marnina Gonick analyzes the discourses and practices defining female sexuality embodiment relationship to self and other material culture use of social space and cultural political agency and power Based on a school community project involving collaborative production of a video which tells the stories of several fictional girl characters Gonick examines the contradictory and textured structure of the discourses available to girls through which their identities are negotiated Woven throughout the book is the integral concern with the way in which ethnographic writing as a discursive practice is also implicated in the production and signification of social identities for girls *Leading with Uncommon Sense* Wiley C. Davi, Duncan H. Spelman, 2020-06-11 This book offers alternatives to typical leadership highlighting new ways of thinking about how individuals can lead effectively Specifically it integrates several fields including neuroscience behavioral economics mindfulness cognitive and social psychology emotional intelligence and management decision making The authors challenge the common sense mainstream thinking about leadership arguing that effective leadership depends on a more complicated understanding of the underlying dynamics When leaders rely on the common sense that they have been taught explicitly or implicitly about leadership the results are often not effective for themselves personally for their followers for the organizations in which they lead and for society as a whole For example aspiring leaders often believe that the mark of good leaders is their ability to come up with quick answers to problems Others believe that one's ability to minimize complexity and uncertainty indicates leadership potential In addition despite the literature suggesting the value of engaging in self reflection few leaders regularly step back and look inward Even those who can intellectually discuss emotional intelligence often focus on their ability to influence the emotions of others rather than reflecting on and learning from their own emotions The book calls for leaders to operate with more humility and greater awareness of the multiple contexts in which they function approaches that improve life for all organizational members As leaders become more effective they will become healthier and more satisfied less harried more grounded and more fulfilled in their lives **Literature and Society** Pamela J. Annas, Robert C. Rosen, 1994 *Classroom Talk for Social Change* Melissa Schieble, Amy Vetter, Kahdeidra Monet Martin, 2020-02-14 Learn how to foster critical conversations in English language arts classrooms This guide encourages teachers to engage students in noticing and discussing harmful discourses about race gender and other identities The authors take readers through a framework that includes knowledge about power a critical learner stance critical pedagogies critical talk moves and vulnerability The text features in depth classroom examples from six secondary English language arts classrooms Each chapter offers specific ways in which teachers can begin and sustain critical conversations with their students including the creation of teacher inquiry groups that use transcript analysis as a learning tool Book Features Strategies that educators can use to facilitate conversations about critical issues In depth classroom examples of teachers

Deconstruction - Derrida Julian Wolfreys, 1998-06-22 Deconstruction Derrida contests the notion that what Jacques Derrida does can be turned into a theory for literary interpretation It also questions the idea that there is a critical methodology called deconstruction which can be applied to literary texts in a programmatic fashion In this introductory study to the work of Jacques Derrida Julian Wolfreys introduces the reader to a range of Derrida's interests and concerns while offering readings informed by Derrida's thought of canonical and less well known literary works

Up the University Robert C. Solomon, Jon Solomon, 1993 Higher education today is big business Subsidized by tuition and taxpayers dollars universities have become giant corporations in which bloated administrations scrounge for funds and professors are hustlers in search of perks and grants What suffers most of all is education Teaching is merely what low ranked professors and graduate students do when they aren't researching and publishing books and articles that will raise them to the ranks where they no longer have to teach In this report from the front lines two award winning professors offer a simple and radical prescription for today's universities Make teaching the top priority once again The Solomons no nonsense and controversial proposals include abolishing tenure slashing administration and reevaluating research In a series of short incisive chapters they examine grades lectures academic journals and college presidents and outline suggestions for mandatory public service before college education parents about education and putting sports into perspective They insist on taking teaching seriously not merely talking about it Finally here is a book about tearing down the walls eliminating the red tape putting an end to money grubbing and creating a real relationship between the university and the community Enough of the ivory tower say the Solomons focusing their discussion not on the prestigious eastern colleges but on large state campuses and community schools throughout the entire country Filled with practical solutions Up the University is a must read for anyone who cares about the future of our democracy
