Kuczaj, 2012-12-06 For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books devoted to work in cognitive development is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The flagship for the Springer Series is a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Each volume in the Progress sequence is strongly thematic in that it is limited to some well defined domain of cognitive developmental research e.g. logical and mathematical development development of learning All Progress volumes will be edited collections Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors are being published as separate volumes within the series *Psychology Express: Developmental Psychology (Undergraduate Revision Guide)* Penney Upton, Dominic Upton, 2014-02-19 This revision guide provides concise coverage of the central topics within Developmental Psychology presented within a framework designed to help you focus on assessment and exams The guide is organised broadly chronologically but with a topical focus in tune with the majority of courses Sample questions assessment advice and exam tips drive the organisation within chapters so you are able to grasp and marshal your thoughts towards revision of the main topics Features focused on critical thinking practical applications and key research will offer additional pointers for you in your revision process and exam preparation A companion website provides supporting resources for self testing exam practice answers to questions in the book and links to further resources **(Pushing) the Limits of**

Neuroplasticity Induced by Adult Language Acquisition Jurriaan Witteman, Leticia Pablos-Robles, Maria Carmen Parafita Couto, Niels Schiller, Yiya Chen, Patrick Wong, 2018-11-08 Most adults attempt to learn a second or even third language at some point in their life Since language exposure is one of the most intense cognitive training regimes one can encounter it is not surprising that previous research has shown that multilingualism can induce profound change in the brain or

neuroplasticity What remains unclear is the scope of such adult language learning induced neuroplasticity In other words much is yet to be investigated about the factors that limit or promote adult language learning induced neuroplasticity On the one hand the present research topic discusses research that sheds light on neural mechanisms that limit adult language learning induced neuroplasticity such as neural mechanisms of first language interference in the acquisition of a second language and reduced opportunity for language induced neuroplasticity due to aging On the other hand the Research Topic discusses factors that could enhance non native language learning and underlying neuroplastic mechanisms such as the duration of the training regime language aptitude and meta linguistic awareness Therefore the goal of the present Research Topic is to examine both the limits of neuroplasticity in adult language learning and the ways to push beyond those limits Understanding of such limits and frontiers to push beyond the limits is not only theoretically fundamental but could also have practical implications for enhancing language training programmes
