Moghaddam,2016-01-25 Covering a topic applicable to fields ranging from education to health care to psychology this book provides a broad critical analysis of the assumptions that researchers and practitioners have about causation and explains how readers can improve their thinking about causation In virtually every laboratory research center or classroom focused on the social or physical sciences today the concept of causation is a core issue to be questioned tested and determined Even debates in unrelated areas such as biology law and philosophy often focus on causality What made that happen In this book experts from across disciplines adopt a reader friendly approach to reconsider this age old question in a modern light defining different kinds of causation and examining how causes and consequences are framed and approached in a particular field Each chapter uses applied examples to illustrate key points in an accessible manner The contributors to this work supply a coherent critical analysis of the assumptions researchers and practitioners hold about causation and

explain how such thinking about causation can be improved Collectively the coverage is broad providing readers with a fuller picture of research in social contexts Beyond providing insightful description and thought provoking questioning of causation in different research areas the book applies analysis of data in order to point the way to smarter more efficient practices Consequently both practitioners and researchers will benefit from this book Human Trafficking Augustine Avwunudiogba, Elisha Jasper Dung, 2021-11-05 Human Trafficking Global History and Perspectives argues that far from being a recent development human trafficking is rooted in the history of the human condition and has only been amplified by globalization Using a multidisciplinary approach that traces the historical roots of human trafficking in global history the chapters explore case studies from different parts of the world to show that human trafficking is not only a global phenomenon but a localized enigma The contributors contend that the causes and thus the solutions are rooted in local and regional social cultural political and economic conditions of victims The case studies include global regional and local examples to analyze the complex causes and effects of human trafficking as well as the legal ramifications Psychology in Action 10th Edition with Dsm-V Update Huffman, 2013-11-14 **The Best Books for Academic Libraries: Medicine**, 2002 Books recommended for undergraduate and college libraries listed by Library of Congress Classification Numbers Psychology in Action 10E with WileyPlus Blackboard Card Karen Huffman, 2012-05-04 *American Book Publishing Record*, 2005 *Breaking Through* Brenda D.
