Economic Life Beyond Economists Abderrazak Belabes, 2024-08-12 Through an examination of the work of great scholars from fields including philosophy literature philology semiology quantum physics history and anthropology this book argues that building on the contribution of non economists can open new areas of reflection in economics beyond the usual schools of thought The purpose of the book is twofold First it offers a critique and discussion of the limits of contemporary economic discourse both mainstream and self styled alternative theories The central theme on which the book is built is that the discipline of economics fails to examine the nature of social reality in a systematic way This prompts the economists to become fully aware of the methodology on which they base their representation analysis and argumentation in a way that economists currently are not Second the book proposes alternative ways of thinking that can help readers of economics to overcome the current limitations of their discipline This means going beyond various dominant dualities orthodox heterodox micro macro epistemology ontology because it is not a question of doing the economy differently but of overcoming the economy as a representation of the world that strives to submit everything to its realm Thus the book does not simply propose a broader conceptual framework than that portrayed by mainstream economists or those who propose an alternative approach but raises questions that do not usually come from the minds of economists at all The book will be of particular interest to readers of economic methodology and pluralism philosophers of science and other social scientists interested in methodological issues

Digital Healthcare and Expertise Claudia Egger, 2022-12-02 This open access book explores how expertise about bipolar disorder is performed on American and French digital platforms by combining insights from STS medical sociology and media studies It addresses topical questions including How do different stakeholders engage with online technologies to perform expertise about bipolar disorder How does the use of the internet for processes of knowledge evaluation and production allow for people diagnosed with bipolar disorder to reposition themselves in relation to medical professionals How do cultural markers shape the online performance of expertise about bipolar disorder And what individualizing or collectivity generating effects does the internet have in relation to the performance of expertise The book constitutes a critical and nuanced intervention into dominant discourses which approach the internet either as a quick technological fix or as a postmodern version of Pandora's box sowing distrust among people and threatening unified conceptualizations and organized forms of knowledge

Expanding Mindscapes Erika Dyck, Chris Elcock, 2023-11-21 The first collection of its kind to explore the diverse and global history of psychedelics as they appealed to several generations of researchers and thinkers Expanding Mindscapes offers a fascinatingly fluid and diverse history of psychedelics that stretches around the globe While much of the literature to date has focused on the history of these drugs in the United States and Canada editors Erika Dyck and Chris Elcock deliberately move away from these places in this collection to reveal a longer and more global history of psychedelics

which chronicles their discovery use and cultural impact in the twentieth century The authors in this collection explore everything from LSD psychotherapy in communist Czechoslovakia to the first applications of LSD 25 in South America to the intersection of modernism and ayahuasca in China Along the way they also consider how psychedelic experiments generated their own cultural expressions where the specter of the United States may have loomed large and where colonial empires exerted influence on the local reception of psychedelics in botanical and pharmaceutical pursuits Breaking new ground by adopting perspectives that are currently lacking in the historiography of psychedelics this collection adds to the burgeoning field by offering important discussions on underexplored topics such as gender agriculture parapsychology anarchism and technological innovations
