The Industrial Processes of Large Economies Xiaojiang Zhang, 2022-01-20 This book tries to build a broad view on industrial processes of large economies and their integration in the world. It provides insight into the industrialization progresses of the quartet of USA, China, Germany, and Japan, all attaining individual industrialization success by distinct trade, fiscal, and industrial policy paths, the underlying principles of which can be traced back to respective nation's roots in civilization. The combination of their industrial output led to the integrated formation of international industrial distribution. While being highly productive, the current distributed pattern yields benefits that are unevenly dispersed among different regions, industries, and societal groups.
