What is pi?

The distance around the outside of a circle is the **circumference**.
The distance across the circle (through the circle) is the **diameter**.

PI is the relationship between the circumferences and the diameter of a circle.

Measure the diameter and circumferences of each circle and write them down (use a piece of string to measure the circumferences). Then for each circle, calculate $c+d$, $c-d$, $c \times d$, and $c:d$. Determine which formula gives the same answer for each circle - that is the formula for pi.

Circle	circumference (c)	diameter (d)	$c+d$	$c-d$	$c \times d$	$c:d$

Katz, Annette Imhausen, 2007-08-05 In recent decades it has become obvious that mathematics has always been a worldwide activity But this is the first book to provide a substantial collection of English translations of key mathematical texts from the five most important ancient and medieval non Western mathematical cultures and to put them into full historical and mathematical context The Mathematics of Egypt Mesopotamia China India and Islam gives English readers a firsthand understanding and appreciation of these cultures important contributions to world mathematics The five section authors Annette Imhausen Egypt Eleanor Robson Mesopotamia Joseph Dauben China Kim Plofker India and J Lennart Berggren Islam are experts in their fields Each author has selected key texts and in many cases provided new translations The authors have also written substantial section introductions that give an overview of each mathematical culture and explanatory notes that put each selection into context This authoritative commentary allows readers to understand the sometimes unfamiliar mathematics of these civilizations and the purpose and significance of each text Addressing a critical gap in the mathematics literature in English this book is an essential resource for anyone with at least an undergraduate degree in mathematics who wants to learn about non Western mathematical developments and how they helped shape and enrich world mathematics The book is also an indispensable guide for mathematics teachers who want to use non Western mathematical ideas in the classroom

John Assaraf has developed a unique and amazing formula that will help people overcome obstacles, transform their careers and businesses and start making the kind of money needed to live an extraordinary life. In his latest book *The Answer*, Assaraf draws on new findings in neuroscience understanding why we do what we do and more importantly why we don't do what we know we should be doing. His methods will help individuals rewire their brains for success so they can emerge as winners no matter what they currently know or understand.
