Using Graywater and Stormwater to Enhance Local Water Supplies National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Water Science and Technology Board, Committee on the Beneficial Use of Graywater and Stormwater: An Assessment of Risks, Costs, and Benefits, 2016-07-30 Chronic and episodic water shortages are becoming common in many regions of the United States and population growth in water scarce regions further compounds the challenges Increasingly alternative water sources such as graywater untreated wastewater that does not

include water from the toilet but generally includes water from bathroom sinks showers bathtubs clothes washers and laundry sinks and stormwater water from rainfall or snow that can be measured downstream in a pipe culvert or stream shortly after the precipitation event are being viewed as resources to supplement scarce water supplies rather than as waste to be discharged as rapidly as possible Graywater and stormwater can serve a range of non potable uses including irrigation toilet flushing washing and cooling although treatment may be needed Stormwater may also be used to recharge groundwater which may ultimately be tapped for potable use In addition to providing additional sources of local water supply harvesting stormwater has many potential benefits including energy savings pollution prevention and reducing the impacts of urban development on urban streams Similarly the reuse of graywater can enhance water supply reliability and extend the capacity of existing wastewater systems in growing cities Despite the benefits of using local alternative water sources to address water demands many questions remain that have limited the broader application of graywater and stormwater capture and use In particular limited information is available on the costs benefits and risks of these projects and beyond the simplest applications many state and local public health agencies have not developed regulatory frameworks for full use of these local water resources To address these issues Using Graywater and Stormwater to Enhance Local Water Supplies analyzes the risks costs and benefits on various uses of graywater and stormwater This report examines technical economic regulatory and social issues associated with graywater and stormwater capture for a range of uses including non potable urban uses irrigation and groundwater recharge Using Graywater and Stormwater to Enhance Local Water Supplies considers the quality and suitability of water for reuse treatment and storage technologies and human health and environmental risks of water reuse The findings and recommendations of this report will be valuable for water managers citizens of states under a current drought and local and state health and environmental agencies **Quality Today** ,2005

Canada and the Global Economy John N. H. Britton,1996 A collection of essays by twenty three of Canada s leading economic geographers Canada and the Global Economy is a comprehensive study of the evolving economic and geographic patterns of Canadian development It provides a benchmark for research on the spatial development of the Canadian economy The contributors explore four central themes the locational impacts of the openness of the Canadian economy Canada s relatively simple economic geography in terms of regional variations in resources and urban development the problems of keeping pace with rapid advances in technology and the role of government in maintaining a national market and assisting economic development They outline the essential elements of Canada s contemporary economic geography and highlight the origins and spatial imprint of change in the Canadian economy in particular they provide an assessment of Canada s participation in significant international patterns of economic change Canada and the Global Economy is concerned not only with the economic size and location of consumption and production but also with institutional changes and shifts in employment the sectoral composition of economic activity and the organizational structure and locational behaviour of

particular industries and firms Special attention is given to the technological development of both established industries and new service and manufacturing activities A timely addition to the field it provides a geographic perspective on significant changes in jobs and types of work that result from the transformation of economic activities Automotive Industries ,2002
