# SERVICE MANUAL

JC636

**SUZUKI**  
Caring for Customers  
SUZUKI/JC636-23E  
(B)

## IMPORTANT

### WARNING/CAUTION/NOTE

Please read this manual and follow its instructions carefully. To emphasize special information, the words **WARNING**, **CAUTION** and **NOTE** have special meanings. Pay special attention to the messages highlighted by these signal words.

#### **WARNING**

Indicates a potential hazard that could result in death or injury.

#### **CAUTION**

Indicates a potential hazard that could result in vehicle damage.

#### **NOTE**

Indicates special information to make maintenance easier or instructions clearer.

#### **WARNING**

This service manual is intended for authorized Suzuki dealers and qualified service technicians only. Inexperienced technicians or technicians without the proper tools and equipment may not be able to properly perform the services described in this manual.

Improper repair may result in injury to the technician and may render the vehicle unsafe for the driver and passengers.

#### **WARNING**

For vehicles equipped with a Supplemental Restraint (Air Bag) System:

- Service on and around the air bag system components or wiring must be performed only by an authorized SUZUKI dealer. Refer to "Air Bag System Components and Wiring Location View" under "General Description" in air bag system section in order to confirm whether you are performing service on or near the air bag system components or wiring. Please observe all **WARNINGS** and "Service Precautions" under "On-Vehicle Service" in air bag system section before performing service on or around the air bag system components or wiring. Failure to follow **WARNINGS** could result in unintentional activation of the system or could render the system inoperative. Either of these two conditions may result in severe injury.
- If the air bag system and another vehicle system both need repair, Suzuki recommends that the air bag system be repaired first, to help avoid unintended air bag system activation.
- Do not modify the steering wheel, instrument panel or any other air bag system component on or around air bag system components or wiring. Modifications can adversely affect air bag system performance and lead to injury.
- If the vehicle will be exposed to temperatures over 50 °C (120 °F), for example, during a paint baking process, remove the air bag system components, that is air bag (inflator) modules, SCV and/or seat belt with pretensioner, beforehand to avoid component damage or unintended activation.
