Gareth Jones, 2022-09-21 As a Christian who has functioned at the interface of biomedical science and faith for the whole of his professional life Gareth Jones is aware of the tensions and misunderstandings that frequently arise both inside and outside the church In this book he argues that Christians should not underestimate the importance of scientific contributions to an understanding of God's world He works this out by reference to his own experiences in approaching a number of contentious topics These include the use of embryos in reproductive technology research the place of vaccines in combatting viral pandemics like COVID 19 and understanding the gender debate Other examples he uses are the treatment of a genetic condition like cystic fibrosis and the importance of using only donated bodies for teaching and research in anatomy In working at these borderlands he recognizes that the best of biomedical science brings glory to God and enhances human existence All these areas are transformed by applying Christian values such as the dignity and equality of human beings Over the years he has learned how to be comfortable working in these borderlands even as they raise questions that trouble many within both society and the churches

The Rise of Trump Matthew C MacWilliams, 2016-09-28 The ascendance of Donald Trump to the presidential candidacy of the Republican Party has been both remarkable and to most commentators unlikely In *The Rise of Trump* America's Authoritarian Spring Matthew MacWilliams argues that Trump's rapid rise through a bewildered Republican Party hierarchy is no anomaly rather MacWilliams argues it is the most recent expression of a long standing theme in American political life the tendency and temptation to an ascriptive politics a political view that builds its basic case on ascribing to any relatively disempowered group whether defined by race ethnicity gender sexual orientation religious belief or other identifying category a certain set of qualities that justify discriminatory treatment The ascriptive tradition in American politics though longstanding has generally been kept to a relatively small minority a minority whose rights perhaps paradoxically have been protected by the principles of Madisonian democracy even though central to its worldview is the need and urgency of limiting the rights of some It has found champions in years past in such figures as Andrew Jackson Huey Long Joseph McCarthy and Pat Buchanan But in Donald Trump this tradition has found a significant new voice one emboldened by deeper shifts in the American political landscape Trump's swift and unsettling rise to the pinnacle of presidential politics may point toward the emergence of more significant and substantial questions about the future course of a democratic government committed to principles of equality and the freedom of expression association and conscience
