**Refiguring Minds in Narrative Media** David Ciccoricco, 2015-12 How do writers represent cognition and what can these representations tell us about how our own minds work *Refiguring Minds in Narrative Media* is the first single author book to explore these questions across media moving from analyses of literary narratives in print to those found where so much cultural and artistic production occurs today computer screens Expanding the domain of literary studies from a focus on representations to the kind of simulations that characterize narratives in digital media such as those found in interactive web based digital fictions and story driven video games David Ciccoricco draws on new research in the cognitive sciences to illustrate how the cybernetic and ludic qualities characterizing narratives in new literary media have significant implications for how we understand the workings of actual minds in an increasingly media saturated culture Amid continued concern about the impact of digital media on the minds of readers and players today and the alarming philosophical questions generated by the communion of minds and machines Ciccoricco provides detailed examples illustrating how stories in virtually any medium can still nourish creative imagination and cultivate critical and ethical reflection Contributing new insights on attention perception memory and emotion *Refiguring Minds in Narrative Media* is a book at the forefront of a new wave of media conscious cognitive literary studies

The Lucifer Principle Howard Bloom,2013-11-01 A philosophical look at the history of our species which alternated between fascinating and frightening like reading Dean Koontz or Stephen King Rocky Mountain News The Lucifer Principle is a revolutionary work that explores the intricate relationships among genetics human behavior and culture

to put forth the thesis that evil is a by product of nature's strategies for creation and that it is woven into our most basic biological fabric. In a sweeping narrative that moves lucidly among sophisticated scientific disciplines and covers the entire span of the earth's as well as mankind's history, Howard Bloom challenges some of our most popular scientific assumptions. Drawing on evidence from studies of the most primitive organisms to those on ants, apes, and humankind, the author makes a persuasive case that it is the group or superorganism rather than the lone individual that really matters in the evolutionary struggle. But biology is not destiny and human culture is not always the buffer to our most primitive instincts we would like to think it is. In these complex threads of thought lies the Lucifer Principle, and only through understanding its mandates will we be able to avoid the nuclear crusades that await us in the twenty-first century. A revolutionary vision of the relationship between psychology and history, *The Lucifer Principle* will have a profound impact on our concepts of human nature. It is astonishing that a book of such importance could be such a pleasure to read. Elizabeth F. Loftus, author of *Memory*
